Contents

0	Introduction to Mathematica	1
0.1	Introduction	1
0.2	Conventions	2
0.3	Getting Started	3
0.4	File Manipulation	4
0.5	Ordinary Differential Equations	5
0.6	To the Instructor	6
0.7	To the Student	7
0.8	MathSource	8
1	Introduction	9
1.1	Notation and Definitions	9
1.2	Initial and Boundary Conditions	11
1.3	Classification of Second-Order Equations	12
1.4	Some Known Equations	14
1.5	Superposition Principle	23
1.6	Mathematica Projects	24
1.7	Exercises	24
2	Method of Characteristics	27
	First-Order Equations	27
2.1	Linear Equations with Constant Coefficients	27
2.2	Linear Equations with Variable Coefficients	32
2.3	First-Order Quasilinear Equations	37
2.4	First-Order Nonlinear Equations	42
	2.4.1 Cauchy's Method of Characteristics	43
2.5	Geometrical Considerations	50

CONTENTS

2.6	Some Theorems on Characteristics	51
	Second-Order Equations	53
2.7	Linear and Quasilinear Equations	53
2.8	Mathematica Projects	59
2.9	Exercises	60
3	Linear Equations with Constant Coefficients	66
3.1	Inverse Operators	66
3.2	Homogeneous Equations	75
3.3	Nonhomogeneous Equations	76
3.4	Mathematica Projects	81
3.5	Exercises	81
4	Orthogonal Expansions	83
4.1	Orthogonality	83
4.2	Orthogonal Polynomials	86
4.3	Series of Orthogonal Functions	87
4.4	Trigonometric Fourier Series	89
4.5	Eigenfunction Expansions	98
4.6	Bessel Functions	100
4.7	Mathematica Projects	106
4.8	Exercises	109
	Table 4.1. Eigenvalue Problem in Cartesian Coordinates	118
	Table 4.2. Eigenvalue Problem in Polar Coordinates	120
5	Separation of Variables	121
5.1	Introduction	121
5.2	Hyperbolic Equations	122
5.3	Parabolic Equations	127
5.4	Elliptic Equations	130
5.5	Cylindrical Polar Coordinates	133
5.6	Spherical Coordinates	134
5.7	Nonhomogeneous Problems	136
5.8	Mathematica Projects	142
5.9	Exercises	151
6	Integral Transforms	159
6.1	Integral Transform Pairs	159
	I. Laplace Transforms	161
6.2	Notation	161
6.3	Basic Laplace Transforms	163
6.4	Inversion Theorem	173
6.5	Mathematica Projects	178
6.6	Exercises	182
	II. Fourier Transforms	188

CONTENTS

6.7	Fourier Integral Theorems	188
6.8	Properties of Fourier Transforms	189
6.8.1	Fourier Transforms of the Derivatives of a Function	189
6.8.2	Convolution Theorems for Fourier Transform	189
6.8.3	Some Fourier Transform Formulas	190
6.9	Fourier Sine and Cosine Transforms	193
6.9.1	Properties of Fourier Sine and Cosine Transforms	193
6.9.2	Convolution Theorems for Fourier Sine and Cosine Transforms	194
6.10	Finite Fourier Transforms	198
6.11	Mathematica Projects	201
6.12	Exercises	204
7	Green's Functions	207
7.1	Generalized Functions	207
7.1.1	Dirac Delta Function in Curvilinear Coordinates	208
7.2	Green's Functions and Adjoint Operators	210
7.2.1	The Concept of a Green's Function	211
7.2.2	Adjoint Operator	213
7.3	Elliptic Equations	216
7.3.1	Green's Function for the Laplacian	216
7.3.2	Harmonic Functions	220
7.3.3	Symmetry of Green's Functions	221
7.3.4	Green's Function for the Helmholtz Operator	222
7.4	Parabolic Equations	224
7.5	Hyperbolic Equations	229
7.6	Applications of Green's Functions	232
7.6.1	Dirichlet Problem	232
7.6.2	Neumann Problem	232
7.6.3	Robin Problem	234
7.6.4	Solution of Helmholtz Equation in Terms of Green's Function	234
7.6.5	Solution of Hyperbolic or Parabolic Equations	235
7.6.6	Integral Transform Method	240
7.7	Computation of Green's Functions	242
7.8	Mathematica Projects	246
7.9	Exercises	249
8	Initial and Boundary Value Problems	255
8.1	Initial and Boundary Conditions	255
8.2	Implicit Conditions	257
8.3	Periodic Conditions	258
8.4	Wave Propagation and Dispersion	263
8.4.1	Wave Propagation	263
8.4.2	Wave Dispersion	268
8.4.3	Damped Waves	270
8.4.4	Thermal Waves	271

CONTENTS

8.5	Boundary Layer Flows	272
8.6	Additional Problems	276
8.7	Ill-Posed Problems	284
8.8	Exercises	287
9	Weighted Residual Methods	304
9.1	Line Integrals	304
9.2	Variational Notation	308
9.3	Multiple Integrals	310
9.4	Weak Variational Formulation	311
9.5	Galerkin Method	315
9.6	Rayleigh-Ritz Method	319
9.7	Choice of Test Functions	323
9.8	Transient Problems	327
9.9	Mathematica Projects	329
9.10	Exercises	330
10	Perturbation Methods	338
10.1	Perturbation Problem	338
10.2	Taylor Series Expansions	339
10.3	Successive Approximations	343
10.4	Boundary Perturbations	344
10.5	Fluctuating Flows	347
10.6	Mathematica Projects	351
10.7	Exercises	351
11	Finite Difference Methods	358
11.1	Finite Difference Schemes	358
11.2	First-Order Equations	361
11.3	Second-Order Equations	364
11.3.1	Diffusion Equation	367
11.3.2	Wave Equation	370
11.3.3	Poisson's Equation	373
11.4	Mathematica Projects	376
11.5	Exercises	378
Appendices:		
A	Green's Identities	383
B	Orthogonal Polynomials	386

CONTENTS

C	Tables of Integral Transform Pairs	392
C.1	Laplace Transform Pairs	392
C.2	Fourier Cosine Transform Pairs	395
C.3	Fourier Sine Transform Pairs	396
C.4	Complex Fourier Transform Pairs	397
C.5	Finite Sine Transform Pairs	398
C.6	Finite Cosine Transform Pairs	399
D	Bessel Functions	400
D.1	Bessel's Equation	400
D.2	Modified Bessel's Equation	402
D.3	Infinite Series and Definite Integrals	404
E	Mathematica Notebooks and Packages	405
	Bibliography	407
	Index	411
