

W. H. Meeks III

A. Ros

H. Rosenberg

The Global Theory of Minimal Surfaces in Flat Spaces

Lectures given at the 2nd Session of the
Centro Internazionale Matematico Estivo
(C.I.M.E.) held in Martina Franca, Italy
July 7-14, 1999

Editor: Gian Pietro Pirola

Fondazione
C.I.M.E.

Springer

Table of Contents

Minimal Surfaces in Flat Three-Dimensional Space	ii
<i>William B. Moyle III</i>	
Introduction	ii
1. The maximum principle at infinity conjecture and the stable minimal surface conjecture	3
2. The geometric Dehn's lemma and related barrier constructions	4
3. Triply periodic minimal surfaces	5
4. Doubly periodic minimal surfaces	7
5. Singly periodic minimal surfaces	8
6. The geometry of minimal surfaces with more than one end	13
References	13
Properly embedded minimal surfaces with finite total curvature	15
<i>Joseph Páez, Antonio Ros</i>	
Introduction	15
1. Background	15
1.1. Weierstrass Representation	16
1.2. Finite Total Curvature	17
1.3. Maximum Principle	19
1.4. Monotonicity Formula	20
1.5. Stability	21
1.6. The Poincaré Problem	21
2. Minimal Surfaces with Vertical Form I	22
2.1. Basic Properties of Horus	22
2.2. Vertical Form	24
2.3. Other Results on Vertical Form	28
3. Minimal Surfaces with Vertical Form II	30
3.1. Immersed 2-manifolds	30
3.2. Topological Uniqueness	32
3.3. Related Results	42
4. Limits of Minimal Surfaces	46
4.1. Minimal Graphs	46
4.2. Sequences with Uniform Curvature Bounds	47
4.2. Sequences with Total Curvature Bounds	51
5. Compactness of the Moduli Space of Minimal Surfaces	54
5.1. Weak Compactness	56
5.2. Strong Compactness	60
References	62

Bryant Surfaces	87
<i>David Rosenberg</i>	
Introduction	87
1 Existence and uniqueness problems	87
2 The cosmic relation.....	89
3 CMC's in $\mathbb{H}^3$	90
4 Some problems	90
5 H-surfaces in $\mathbb{H}^3$	93
6 Properly embedded minimal surfaces in $\mathbb{H}^3$	93
7 Bryant's representations	94
8 Moving frames	96
9 The structure equation of $\mathbb{H}^3$ and $\mathcal{E}_\infty$	99
10 Surfaces in $\mathbb{H}^3$ and the structure equations of adapted frames.....	100
11 Constructing explicit examples of Bryant surfaces starting with a minimal surface in $\mathbb{H}^3$	111
12 Properly embedded Bryant surfaces ends	112
13 Non-density at infinity	113
14 Some applications of the cosmic and Cherns	116
References	119
