

Integrals and Measures

Washek F. Pfeffer

*Professor of Mathematics
University of California
Davis, California*

MARCEL DEKKER, INC. New York and Basel

CONTENTS

Preface	vii
Acknowledgments	ix
0. Introduction	1
1. Preliminaries	9
2. Fundamental Systems of Functions and their First Extensions	21
3. The Fundamental System of Functions in a Topological Space	31
4. Integrals on the Fundamental System and their First Extensions	43
5. Upper and Lower Integrals; Summable Functions	55
6. The Final Extension; Integrable Functions	69
7. Measurable Functions	81
8. Measures and the Abstract Lebesgue Integral	97
9. Measures in a Topological Space	109
10. Measures Induced by Integrals	121
11. Almost Everywhere	135
12. Integrals Induced by Measures	147
13. Integrals Induced by Measures in a Topological Space	161
14. Integration Over Measurable Sets	173
15. The Abstract Fubini Theorem	183
16. Product Measures	195
17. Product Measures in a Topological Space	209
18. Regularity of Borel Measures	223
References	251
List of Frequently Used Symbols	253
Index	257
