

Elliptic Polynomials

J.S. Lomont
John Brillhart

CHAPMAN & HALL/CRC

Boca Raton London New York Washington, D.C.

Contents

Contents	vii
Tables	ix
Preface	xi
Introduction	xv
1. Binomial Sequences of Polynomials	1
(a) The functions $\mathcal{F}$	2
(b) The functions $\mathcal{F}_0$ – The sequences $\{G_m(z)\}$ and $\{H_m(z)\}$	8
2. The Binomial Sequences Generated from f^{-1} , $f \in \mathcal{F}_0$	25
3. The Functions $\mathcal{F}_1$ – Elliptic Polynomials of the First Kind	33
4. The Moment Polynomials – $P_n(x, y)$, $Q_n(x, y)$, and $R_n(x, y)$	43
5. The Functions $\mathcal{F}_1^{-1}$ – Elliptic Polynomials of Second Kind	71
6. Inner Products, Integrals, and Moments – Favard's Theorem	89
7. The Functions $\mathcal{F}_2$ – Orthogonal Sequences $\{G_m(z)\}$, $\{H_m(z)\}$	97
8. The Functions in Classes I and II	111
(a) Class I Functions – The elliptic functions $\operatorname{sn}(t, k)$	111
(b) Class II Functions – The polynomials $f^*(t, k)$	126
9. The Tangent Numbers	141
10. Class III Functions – The $\delta_n(x)$ Polynomials	145
11. Coefficients of the $\delta_n(x)$ Polynomials	189
12. The $\lambda_n(x)$ Polynomials	197
13. The Orthogonal Sequences $\{A_m(z)\}$ and $\{B_m(z)\}$	211
14. The Weight Functions for $\{A_m(z)\}$ and $\{B_m(z)\}$	225
15. Miscellaneous Results	239
16. Uniqueness and Completion Results	247
17. Polynomial Inequalities	251
18. Some Concluding Questions	269
References	271
Name Index	277
Subject Index	281
Symbol Index	287
