TEORIA degli INSIEMI

Seymour LIPSCHUTZ

ETAS LIBRI

Table of Contents

Preface v

Opening speech of Petr Vopěnka vii

Bolzano Medal awarded to Gaisi Takeuti viii

Collapsing Polynomial-Time Degrees
Klaus Ambos-Spies, Levke Bentzien, Peter A. Fejer, Wolfgang Merkle, and Frank Stephan 1

Qualitative and Probabilistic Models of Full Belief
Horacio Arló Costa 25

Relative Splittings of $0'_z$ in the Δ^0_2 - Enumeration Degrees
Marat M. Arslanov and Andrea Sorbi 44

A Realizability Interpretation for Classical Arithmetic
Jeremy Avigad 57

An Axiomatization of Quantified Propositional Gödel Logic Using the Takeuti-Titani Rule
Matthias Baaz and Helmut Veith 91

Another Pathological Well-Ordering
Lev Beklemishev 105

How Small Can the Set of Generics Be?
Jörg Brendle 109

Entailment Relations and Distributive Lattices
Jan Cederquist and Thierry Coquand 127

The Friedberg Jump Inversion Theorem Revisited: A Study of Undefinable Cuts
Chi Tat Chong, Lei Qian, and Yue Yang 140

Hartley Rogers' 1965 Agenda
S. Barry Cooper 154

Liftings of Homomorphisms Between Quotient Structures and Ulam Stability
Ilijas Farah 173

Mathematical Fuzzy Logic – State of Art
Petr Hájek 197

Reflections on the Last Delfino Problem
Kai Hauser 206

Continuous Images of Coanalytic Sets
Greg Hjorth 226

Classification of Subsheaves over GL-Algebras
Ulrich Höhle 238

On the Δ^1_1-Bit-Comprehension Rule
Jan Johannsen and Chris Pollett 262

Cardinal Invariants Associated with Predictors
Shizuo Kamo 280

A Theorem on Countable Ordered Sets with an Application to Universal Graphs
Péter Komjáth 296

Dimension Theory and Smooth Stratification of Rigid Subanalytic Sets
Leonard Lipshitz and Zachary Robinson 302

The Ramsey Structure of A-Determined Sets in a κ-Saturated Universe
Josef Mlček and Pavol Zlatoš 316

On Σ–Definability of Admissible Sets
Andrei S. Morozov 334

Additive Theories
Evgeni A. Palyutin 352

Adding Multiplication to an O-minimal Expansion of the Additive Group of Real Numbers
Yaácov Peterzil, Patrick Speissegger, and Sergei Starchenko 357

The Superjump in Martin-Löf Type Theory
Michael Rathjen 363

"Just Because": Taking Belief Bases Seriously
Hans Rott 387

Artin Approximation via the Model Theory of Cohen-Macaulay Rings
Hans Schoutens 409

Ordinal Systems, Part 2: One Inaccessible
Anton Setzer 426

Autonomous Fixed Point Progressions and Fixed Point Transfinite Recursion
Thomas Strahm 449

Finitary Reductions for Local Predicativity, I: Recursively Regular Ordinals
Sergei Tupailo 465

The Complexity of Linear Logic with Weakening
Alasdair Urquhart 500

Some Remarks on the Maximality of Inner Models
Philip D. Welch 516

Author Index 541
