CONTENTS

Preface vii

PART I. BANACH SPACES 1

1. Normed Spaces 3
2. Banach Spaces 10
3. Normed Subspaces 20
4. Equivalent Norms 25
5. Spaces of Continuous Linear Operators 33
6. Continuous Linear Forms 43
7. Isometries 50
8. Cartesian Products and Direct Sums 52
9. Cartesian Products of Normed Spaces 57
10. Topological Direct Sums 60
11. Finite Dimensional Normed Spaces 63
12. Spaces of Continuous Multilinear Operators 77

PART II. DIFFERENTIAL CALCULUS 85

13. Differential Calculus in Normed Spaces 87
14. The Differential in Normed Spaces 92
15. Continuous Affine Tangent Mappings 97
16. Some Rules of Differential Calculus 99
17. The Scalar Variable Case 112
18. The Lagrange Mean Value Theorem 115

19. Mappings with Zero or Constant Derivatives	124
20. Interchanging the Order of Differentiation and Limit	127
21. Continuously Differentiable Mappings	131
22. Partial Differentiation	133
23. Natural Identifications for Multilinear Mappings	143
24. Higher Order Differentiation	150
Notation	161
Bibliography	163
Index	165
