Table

Karl G. Andersson	Global solvability of partial differential equations in the space of real analytic functions.	1
J. Barros-Neto et F. Trèves	Hypoelliptic operators with double characteristics and constant multiplicity.	5
C. A. Berenstein et M. A. Dostal	On convolution equations II.	9
Earl Berkson et Horacio Porta	A brief survey of generalized hermitian elements.	21
J. Blatter et G. L. Seever	Interposition of semi-continuous functions by continuous functions.	27
Haïm Brésis	The Euler equation via ordinary differential equations.	53
Fernando Cardoso et François Trèves	On Subelliptic Pseudo-differential Operators.	61
Robert Carroll	On a class of canonical singular Cauchy problems.	71
Gérard Cœuré	$\mathcal{C}$ -completion of normed spaces.	91
Thomas A. W. Dwyer	Holomorphic representation of tempered distributions and weighted fock spaces.	95
Marc de Wilde	Perturbation of maps in locally convex spaces.	119
Jerome A. Goldstein	Temporally inhomogeneous scattering theory.	125

Chaitan P. Gupta	A new existence theorem for nonlinear integral equations of Hammerstein type involving unbounded linear mappings.	133
Lawrence A. Harris	Bounds on the Derivatives of Holomorphic Functions of Vectors.	145
Nicholas D. Kazarinoff et Clifford O. Bloom	Energy Decay in nonhomogeneous media.	165
Pierre Lelong	Ensembles analytiques et courants positifs fermés.	173
Jacques L. Lions	A remark on non linear boundary value problems including simultaneously regularization and penalty.	189
Jacques L. Lions	Une application de la dualité aux problèmes régularisés et pénalisés.	199
Lawrence Narici, Eduard Beckenstein George Bachman	Locally Convex Algebras of Continuous Functions over Valued Fields.	207
Domingos Pisanelli	Sur la LF-analyticité.	215
João B. Prolla	On Operator-induced Topologies.	225
Ubaldo Richard	Sur les inégalités du type de Wirtinger et leur application aux équations différentielles ordinaires.	233
C. E. Rickart	A function algebra approach to infinite dimensional holomorphy.	245
Martin Schottenloher	e-product and continuation of analytic mappings.	261
Stephen Simons	Convergence Theorems, Hahn-Banach and Choquet Theorems, Minimax Theorems and James's Theorem.	271
William H. Summers	Weighted approximation for modules of continuous functions II.	277
