

ELEMENTS OF THE TOPOLOGY OF PLANE SETS OF POINTS

SECOND EDITION

M.H.A. Newman

DOVER PUBLICATIONS, INC.
NEW YORK

CONTENTS

<i>Preface to the Second Edition</i>	<i>page vii</i>
--------------------------------------	-----------------

Chapter I. SETS

§ 1. The calculus of sets	1
§ 2. Enumerable and non-enumerable sets	10

Chapter II. CLOSED SETS AND OPEN SETS IN METRIC SPACES

§ 1. Closed and open sets	17
§ 2. Convergent sequences of points. Compact sets	37
§ 3. Induced structure. Relative and absolute properties	48
§ 4. Complete spaces	51

Chapter III. HOMEOMORPHISM AND CONTINUOUS MAPPINGS

§ 1. Equivalent metrics. Topological spaces. Homeomorphism	56
§ 2. Continuous mappings	66

Chapter IV. CONNECTION

§ 1. Connected sets	71
§ 2. Components	77
§ 3. Connection in compact spaces	81
§ 4. Local connection	84
§ 5. Topological characterisation of segment and circle	93

Chapter V. SEPARATION THEOREMS

§ 1. Chains on a grating	101
§ 2. Alexander's Lemma and Jordan's Theorem	110
§ 3. Invariance of dimension number and of open sets	120
§ 4. Further separation theorems	123
§ 5. Extension to sets of points in Z^p and R^p	128

*Chapter VI. SIMPLY- AND MULTIPLY-CONNECTED PLANE
DOMAINS*

§ 1. Simply-connected domains	<i>page</i> 140
§ 2. Mapping on a standard domain	146
§ 3. Connectivity of open sets	152
§ 4. Relations of a domain to its frontier	159
§ 5. Topological mapping of Jordan domains and their closures	169

Chapter VII. HOMOTOPY PROPERTIES

§ 1. Paths and deformations	175
§ 2. Intersection and orientation of paths in R^2	188
