

Computational Ordinary Differential Equations

Based on the proceedings of a conference on Computational Ordinary Differential Equations, organized by The Institute of Mathematics and its Applications and held at Imperial College of Science and Technology, University of London, in July 1989

Edited by

I. R. CASH

Department of Mathematics

Imperial College of Science, Technology, and Medicine, London, UK

and

I. GLADWELL

Department of Mathematics

Southern Methodist University, Dallas, USA

CLARENDON PRESS · OXFORD · 1992

CONTENTS

List of contributors	xi
Algebraic Conditions for A-stable Runge-Kutta Methods R. Scherer and M. Müller	1
Contractivity in the Maximum Norm for Runge-Kutta Methods J. F. B. M. Kraaijevanger	9
Stability Criteria in the Numerical Solution of Initial Value Problems M. N. Spijker	19
Some new hybrid methods for initial value problems J. C. Butcher	29
A Family of Nordsieck Methods K. Burrage and P. W. Sharp	47
Multistep Methods for Ordinary Differential Equations Based on Algebraic and First Order Trigonometric Polynomials J. Vanthournout, H. de Meyer, and G. Van den Berghe	61
Runge-Kutta Equilibrium Theory for a Mixed Relative/Absolute Error Measure D. H. Higham and G. Hall	73
Detecting Stability Barriers in BDF Solvers A. C. Hindmarsh	87
Continuous Explicit Runge-Kutta Methods B. Owren and M. Zennaro	97
Dense Output for the GBS Extrapolation Method E. Hairer and A. Ostermann	107
Methods for Starting Iteration Schemes for Implicit Runge-Kutta Formulae J. Sand	115

Efficient <i>P</i> -stable Methods for Second Order Systems M. S. H. Khayat and R. M. Thomas	127
New Continuous Extensions for the Dormand and Prince RK Method M. Calvo, J. I. Montijano, and L. Rández	135
The Next Generation of Runge-Kutta Codes L. Shampine and L. Gladwell	145
Application of the Chapman-Easkog Method to an Asymptotic Analysis of Stiff Systems of Ordinary Differential Equations J. R. Mika	165
Singular Perturbation Phenomena for Two-Point Boundary Value Problems R. E. O'Malley, Jr	175
On the Implementation of an Algebraic Difference Scheme for Stiff BVPs B. A. Schmitt	193
Boundary Value Problem Continuation with Moving Meshes J. R. Cash, R. D. Russell, and Y. Ren	201
A Review of Some Developments in Collocation Algorithms K. Wright	215
Continuation and Gauss-Newton techniques G. Bader and P. Kunkel	225
The Inverse Problem in Ordinary Differential Equations P. E. Zadunaisky	237
SDIRK-Methods for Differential-Algebraic Equations of Index 1 A. Kværnø	251
Numerical Methods for Differential-Algebraic Equations —Current Status and Future Directions L. Petzold	259

Numerical Methods for Differential-Algebraic Equations Describing Constrained Mechanical Motion C. Führer and B. Leimkuhler	275
Dynamic Iteration Schemes for Differential-Algebraic Equations in Large Scale Circuit Simulation K. B. Leimkuhler, U. Miekkala, and O. Nevanlinna	285
Towards Efficient DAE Solvers for the Solution of Dynamic Simulation Problems A. J. Preston, M. Berzins, P. M. Dew, and L. E. Scales	299
Towards an Automatic Algorithm for the Numerical Solution of Parabolic Partial Differential Equations Using the Method of Lines J. Lawson and M. Berzins	309
Pragmatic Experiments with Krylov Methods in the Stiff ODE Setting G. D. Byrne	323
Relaxation-based Integration by Runge-Kutta Methods and its Applications to the Moving Finite Element Method I. Lie and R. Skålin	357
Determination of Stress Intensity – and Higher Order Factors – Using the Method of Lines and ODE Solvers L. S. Xanthis and B. H. Edwards	369
Potential for Parallelism in Explicit Linear Methods R. D. Skeel and H.-W. Tam	377
Parallel Runge-Kutta Methods A. Iserles and S. P. Nørsett	385
Parallel Methods for the Numerical Solution of Ordinary Differential Equations H. W. Tam	393
Numerical Methods for Discontinuous ODEs and Differential Inclusions H.-D. Niepage	405

Existence and Inclusion for Two-point Boundary Value Problems by Numerical Means M. Plum	415
Computation of Guaranteed Enclosures for the Solutions of Ordinary Initial and Boundary Value Problems R. J. Lohner	425
The Numerical Integration of Hamiltonian Systems J. M. Sanz-Serna	437
Global Error Estimation using Runge-Kutta Pairs J. R. Dormand and P. J. Prince	451
