

R. Kannan Carole King Krueger

Advanced Analysis

on the Real Line

Springer

Contents

Preface	v
Chapter 0 Preliminaries	1
0.1 Lebesgue Measure	1
0.2 The Lebesgue Integral	7
0.3 Vitali Covering Theorem	10
0.4 Baire Category Theorem and Baire Class Functions	18
Chapter 1 Monotone Functions	19
1.1 Continuity Properties	19
1.2 Differentiability Properties	22
1.3 Reconstruction of f from f'	25
1.4 Series of Monotone Functions	31
Exercises	33
Chapter 2 Density and Approximate Continuity	37
2.1 Preliminaries and Definitions	37
2.2 The Lebesgue Density Theorem	40
2.3 Approximate Continuity	43
2.4 Approximate Continuity and Integrability	46
2.5 Further Results on Approximate Continuity	48
2.6 Sierpinski's Theorem	49
2.7 The Darboux Property and the Density Topology	50
Exercises	52
Chapter 3 Dini Derivatives	55
3.1 Preliminaries and Definitions	55

3.2	Simple Properties of Derivatives	58
3.3	Ruziewicz's Example	60
3.4	Further Properties of Derivatives	62
3.5	The Denjoy–Saks–Young Theorem	67
3.6	Measurability of Dini Derivatives	71
3.7	Dini Derivatives and Convex Functions	74
	Exercises	76
Chapter 4	Approximate Derivatives	81
4.1	Definitions	81
4.2	Measurability of Approximate Derivatives	82
4.3	Analogue of the Denjoy–Saks–Young Theorem	85
4.4	Category Results for Approximate Derivatives	88
4.5	Other Properties of Approximate Derivatives	98
	Exercises	101
Chapter 5	Additional Results on Derivatives	102
5.1	Derivatives	102
5.2	Derivates	103
5.3	Approximate Derivatives	105
5.4	The Denjoy Property	112
5.5	Metrically Dense	114
Chapter 6	Bounded Variation	118
6.1	Bounded Variation of Finite Intervals	118
6.2	Stieltjes Integral	131
6.3	The Space $BV[a, b]$	136
6.4	BV_{loc} and L^1_{loc}	140
6.5	Additional Remarks on Fubini's Theorem	147
	Exercises	148
Chapter 7	Absolute Continuity	153
7.1	Absolute Continuity	153
7.2	Rectifiable Curves	173
	Exercises	178
Chapter 8	Cantor Sets and Singular Functions	181
8.1	The Cantor Ternary Set and Function	181
8.2	Hausdorff Measure	189
8.3	Generalized Cantor Sets—Part I	196
8.4	Generalized Cantor Sets—Part II	197
8.5	Cantor-like Sets	199
8.6	Strictly Increasing Singular Functions	208
	Exercises	213

Chapter 9	Spaces of BV and AC Functions	216
9.1	Convergence in Variation	216
9.2	Convergence in Length	220
9.3	Norms on AC	228
9.4	Norms on BV	237
Chapter 10	Metric Separability	246
	Exercises	251
	Bibliography	253
	Index	257
