Contents

Preface vii

Classical Sequence Spaces **1–26**

1. On Orlicz Sequence Spaces with the β-Property 1
Bor-Luh Lin and Zhongrui Shi

2. The Space of Entire Sequences 4
K. Chandrasekhara Rao

3. Universal Musielak-Orlicz Sequence Spaces 9
Marek Wojtowicz

4. Degree of Approximation of Functions in L^p by Power Series Method of Summation 14
G. Das, Ellipse and B.K. Ray

Duals and Matrix Transformation **27–83**

5. The Second Duals of Some Sequence Spaces 27
Sri Daru Unoningsih and Lee Peng Yee

6. On Generalized Matrix Domains 35
E. Malkowsky

7. Generalized Sets of Difference Sequences, Their Duals and Matrix Transformations 68
E. Malkowsky, Mursaleen and Qamaruddin

Structure and Topology **84–106**

8. Multipliers of Sequence Spaces 85
William H. Ruckle

9. Weakly Sequential Completeness of Banach-Value Sequence Space $l_p[X]$ 93
Qing-Ying Bu

10. Algebraic Properties Implying Weak Sequential Completeness 99
Charles Swartz

Applications **107–148**

11. Sequence Space Representations of $D((M_k), L^p)$ and $D(\{M_k\}, L^p)$ 107
R.S. Pathak

12. Geometry of Star-Algebras and Sequence Spaces 118
A.K. Gaur and N.R. Nandakumar

13. The Tauberian Gap Theorem for the Abel Method 130
Hubert Tietz and Karl Zeller

14. A Class of Nuclear Operators 135
Ivor J. Maddox

15. Self Jung Constants and Product Spaces 140
Emanuele Casini and Pier Luigi Papini
