

*A First Course in
Differential Geometry*

CHUAN-CHIH HSIUNG

Lehigh University

Contents

GENERAL NOTATION AND DEFINITIONS

CHAPTER 1. EUCLIDEAN SPACES

1. Point Sets, 1

- 1.1. Neighborhoods and Topologies, 1
- 1.2. Open and Closed Sets, and Continuous Mappings, 4
- 1.3. Connectedness, 7
- 1.4. Infimum and Supremum, and Sequences, 9
- 1.5. Compactness, 11

2. Differentiation and Integration, 15

- 2.1. The Mean Value Theorems, 15
- 2.2. Taylor's Formulas, 17
- 2.3. Maxima and Minima, 18
- 2.4. Lagrange Multipliers, 20

3. Vectors, 23

- 3.1. Vector Spaces, 23
- 3.2. Inner Product, 24
- 3.3. Vector Product, 25
- 3.4. Linear Combinations and Linear Independence;
Bases and Dimensions of Vector Spaces, 27
- 3.5. Tangent Vectors, 29
- 3.6. Directional Derivatives, 32

4. Mappings, 35

- 4.1. Linear Transformations and Dual Spaces, 35
- 4.2. Derivative Mappings, 40

5. Linear Groups, 46

- 5.1. Linear Transformations, 46
- 5.2. Translations and Affine Transformations, 52

- 5.3. Isometries or Rigid Motions, 54
- 5.4. Orientations, 59
- 6. Differential Forms, 64**
 - 6.1. 1-Forms, 64
 - 6.2. Exterior Multiplication and Differentiation, 67
 - 6.3. Structural Equations, 73
- 7. The Calculus of Variations, 75**

CHAPTER 2. CURVES

78

- 1. General Local Theory, 78**
 - 1.1. Parametric Representations, 78
 - 1.2. Arc Length, Vector Fields, and Knots, 82
 - 1.3. The Frenet Formulas, 88
 - 1.4. Local Canonical Form and Osculants, 100
 - 1.5. Existence and Uniqueness Theorems, 105
- 2. Plane Curves, 109**
 - 2.1. Frenet Formulas and the Jordan Curve Theorem, 109
 - 2.2. Winding Number and Rotation Index, 110
 - 2.3. Envelopes of Curves, 112
 - 2.4. Convex Curves, 113
 - 2.5. The Isoperimetric Inequality, 118
 - 2.6. The Four-Vertex Theorem, 123
 - 2.7. The Measure of a Set of Lines, 126
 - 2.8. More on Rotation Index, 130
- 3. Global Theorems for Space Curves, 139**
 - 3.1. Total Curvature, 139
 - 3.2. Deformations, 147

CHAPTER 3. LOCAL THEORY OF SURFACES

151

- 1. Parametrizations, 151**
- 2. Functions and Fundamental Forms, 170**
- 3. Form of a Surface in a Neighborhood of a Point, 182**
- 4. Principal Curvatures, Asymptotic Curves, and Conjugate Directions, 188**
- 5. Mappings of Surfaces, 197**

6. Triply Orthogonal Systems, and the Theorems of Dupin and Liouville, 203	
7. Fundamental Equations, 207	
8. Ruled Surfaces and Minimal Surfaces, 214	
9. Levi-Civita Parallelism, 224	
10. Geodesics, 229	
 CHAPTER 4. GLOBAL THEORY OF SURFACES	 241
1. Orientation of Surfaces, 241	
2. Surfaces of Constant Gaussian Curvature, 246	
3. The Gauss-Bonnet Formula, 252	
4. Exterior Differential Forms and a Uniqueness Theorem for Surfaces, 267	
5. Rigidity of Convex Surfaces and Minkowski's Formulas, 275	
6. Some Translation and Symmetry Theorems, 280	
7. Uniqueness Theorems for Minkowski's and Christoffel's Problems, 285	
8. Complete Surfaces, 292	
 Appendix 1. Proof of Existence Theorem 1.5.1, Chapter 2	 307
Appendix 2. Proof of the First Part of Theorem 7.3, Chapter 3	309
