# Contents

*Preface to the Classics Edition* xiii
*Preface* xvii
*Glossary of Notations* xix

**Introduction** 1

**Chapter I Variational Inequalities in $\mathbb{R}^n$**

1. Fixed Points 7
2. The Characterization of the Projection onto a Convex Set 8
3. A First Theorem about Variational Inequalities 11
4. Variational Inequalities 13
5. Some Problems Which Lead to Variational Inequalities 15
Comments and Bibliographical Notes 18
Exercises 18

**Chapter II Variational Inequalities in Hilbert Space**

1. Bilinear Forms 23
2. Existence of a Solution 24
3. Truncation 27
4. Sobolev Spaces and Boundary Value Problems 28
5. The Weak Maximum Principle 35
6. The Obstacle Problem: First Properties 40
7. The Obstacle Problem in the One Dimensional Case 47
Appendix A. Sobolev Spaces 49
Appendix B. Solutions to Equations with Bounded Measurable Coefficients 62

Appendix C. Local Estimates of Solutions 66
Appendix D. Hölder Continuity of the Solutions 72
Comments and Bibliographical Notes 76
Exercises 77

**Chapter III Variational Inequalities for Monotone Operators**

1. An Abstract Existence Theorem 83
2. Noncoercive Operators 87
3. Semilinear Equations 93
4. Quasi-Linear Operators 94
Comments and Bibliographical Notes 100
Exercises 101

**Chapter IV Problems of Regularity**

1. Penalization 105
2. Dirichlet Integral 106
3. Coercive Vector Fields 113
4. Locally Coercive Vector Fields 116
5. Another Penalization 120
6. Limitation of Second Derivatives 124
7. Bounded Variation of $Au$ 130
8. Lipschitz Obstacles 134
9. A Variational Inequality with Mixed Boundary Conditions 139

Appendix A. Proof of Theorem 3.3 143
Comments and Bibliographical Notes 146
Exercises 147

**Chapter V Free Boundary Problems and the Coincidence Set of the Solution**

1. Introduction 149
2. The Hodograph and Legendre Transformations 153
3. The Free Boundary in Two Dimensions 155
4. A Remark about Singularities 166
5. The Obstacle Problem for a Minimal Surface 167
6. The Topology of the Coincidence Set When the Obstacle Is Concave 173
7. A Remark about the Coincidence Set in Higher Dimensions 178

Comments and Bibliographical Notes 181
Exercises 182

**Chapter VI Free Boundary Problems Governed by Elliptic Equations and Systems**

1. Introduction 184
2. Hodograph and Legendre Transforms: The Theory of a Single Equation 185

3. Elliptic Systems 190
4. A Reflection Problem 202
5. Elliptic Equations Sharing Cauchy Data 204
6. A Problem of Two Membranes 212
Comments and Bibliographical Notes 218
Exercises 218

**Chapter VII Applications of Variational Inequalities**

1. Introduction 222
2. A Problem in the Theory of Lubrication 223
3. The Filtration of a Liquid through a Porous Medium 227
4. The Resolution of the Filtration Problem by Variational Inequalities 235
5. The Filtration of a Liquid through a Porous Medium with Variable Cross Section 242
6. The Resolution of the Filtration Problem in Three Dimensions 249
7. Flow past a Given Profile: The Problem in the Physical Plane 257
8. Flow past a Given Profile: Resolution by Variational Inequalities 260
9. The Deflection of a Simply Supported Beam 270
Comments and Bibliographical Notes 273
Exercises 274

**Chapter VIII A One Phase Stefan Problem**

1. Introduction 278
2. Existence and Uniqueness of the Solution 281
3. Smoothness Properties of the Solution 289
4. The Legendre Transform 297
Comments and Bibliographical Notes 299

**Bibliography** 300
