

Symbolic Computation and Automated Reasoning

The CALCULEMUS-2000 Symposium

Edited by
Manfred Kerber
Michael Kohlhase

A K Peters
Natick, Massachusetts

Contents

PART I	Regular Contributions	1
Definite Integration of Parametric Rational Functions		3
<i>Andrew A. Adams</i>		
How to Find Symmetries Hidden in Combinatorial Problems		18
<i>Noriko H. Arui and Ryuji Masubara</i>		
Communication Protocols for Mathematical Services		33
<i>Alessandro Armando, Michael Kohlhase, and Silvio Ranise</i>		
Interfacing Computer Algebra and Deduction Systems		49
<i>Alessandro Armando and Daniele Zini</i>		
Development of the Theory of Continuous Lattices in Mizar		65
<i>Grzegorz Bancerek</i>		
Ω -ANTS – Combining Interactive and Automated Theorem Proving		81
<i>Christoph Benzmliller and Volker Sorge</i>		
The THEOREM ν Project: A Progress Report		98
<i>Bruno Buchberger, Claudio Dupré, Tudor Jebelean, Franz Kriftner, Koji Nakagawa, Daniela Vásarn, Wolfgang Windsteiger</i>		
How to Formally and Efficiently Prove Prime(2999)		114
<i>Olga Caprotti and Martijn Oostdijk</i>		
On the EA-Style Integrated Processing of Self-Contained Mathematical Texts		126
<i>Anatoli I. Degtyarev, Alexander V. Lyaletski, and Marina K. Morokhovets</i>		

Towards Learning New Methods in Proof Planning <i>Mateja Jamnik, Manfred Kerber, and Christoph Benzmüller</i>	142
Using Meta-variables for Natural Deduction in Theorema <i>Boris Konev and Tudor Jebelean</i>	159
Exploring Properties of Residue Classes <i>Andreas Meier and Volker Sorge</i>	175
Defining Power Series and Polynomials in Mizar <i>Piotr Rudnicki, Christoph Schwarzweiller, and Andrzej Trybulec</i>	191
Logic and Dependent Types in the Aldor Computer Algebra System <i>Simon Thompson</i>	205
PART II Invited Presentations	221
Communicating Mathematics on the Web <i>Henk Barendregt and Arjeh Cohen</i>	223
Teaching Mathematics Across the Internet <i>Gaston H. Gonnet</i>	224
PART III System Description	225
SINGULAR - A Computer Algebra System for Polynomial Computations <i>Gert-Martin Greuel, Gerhard Pfister, and Hans Schönemann</i>	227
PART IV Posters	235
Integration of Automated Reasoners: a Progress Report <i>Alessandro Armando, Silvio Ranise, and Daniele Zini</i>	237
Algorithmic Theories and Context <i>Clemens Ballarín and Jacques Calmet</i>	239
The GiNaC Framework for Symbolic Computation... <i>Christian Bauer, Alexander Frink, and Richard Kreckel</i>	241

A Framework for Propositional Model Elimination Algorithms <i>Marco Benedetti</i>	243
Resource Guided Concurrent Deduction <i>Christoph Benzmüller, Mateja Jamnik, Manfred Kerber, and Volker Sorge</i>	245
Automated 'Plugging and Chugging' <i>Simon Colton</i>	247
Integrating SAT solvers with domain-specific reasoners <i>Fausto Giunchiglia, Roberto Sebastiani, and Paolo Traverso</i>	249
Solving Integrals at the Method Level <i>Alex Heneveld, Ewen Maclean, Alan Bundy, Jacques Fleuriet, and Alan Smaill</i>	251
Lightweight Probability Theory for Verification <i>Joe Hurd</i>	253
St Andrews CAAR Group: Poster Abstract <i>Tom Kelsey</i>	255
OpenXM — an Open System to Integrate Mathematical Software <i>Masahide Machawa, Yukio Okufani, Nobuki Takayama, Yasushi Tamura, Masayuki Noro, and Katsuyoshi Ohara</i>	257
Presentation of the Foc project <i>Renaud Rioboo</i>	259
