CONTENTS

CHAPTER 1	INTRODUCTION	1
1.1	Initial-Value Problems	1
1.2	Two-Point Boundary-Value Problems	7
	1.2.1 *Boundary-Value Problems for General Systems*	13
1.3	Numerical Methods for Initial-Value Problems	21
1.4	Iterative Solution of Nonlinear Systems; Contracting Maps	30
CHAPTER 2	INITIAL-VALUE METHODS (SHOOTING)	39
2.1	Linear Second-Order Equations and Systems	39
2.2	Nonlinear Second-Order Equations	47
2.3	Linear and Nonlinear Systems	54
2.4	Variants of Shooting; Parallel Shooting	61
	2.4.1 *Power Series*	68
CHAPTER 3	FINITE-DIFFERENCE METHODS	72
3.1	Linear Second-Order Equations	72
	3.1.1 *Difference Corrections and $h \to 0$ Extrapolation*	78
3.2	Nonlinear Second-Order Equations	83
3.3	Linear and Nonlinear Systems	91
	3.3.1 *Difference Corrections and $h \to 0$ Extrapolation*	100
CHAPTER 4	INTEGRAL-EQUATION METHODS	106
4.1	Green's Functions; Equivalent Integral Equations	106
4.2	Numerical Solution of Integral Equations	112
CHAPTER 5	EIGENVALUE PROBLEMS	122
5.1	Introduction; Sturm-Liouville Problems	122
5.2	Initial-Value Methods for Eigenvalue Problems	125

5.3	Finite-Difference Methods	131
5.4	Eigenvalue Problems for Integral Equations	138
5.5	Generalized Eigenvalue Problems	142
	5.5.1 *Poincaré Continuation, Continuity Methods*	146
CHAPTER 6	PRACTICAL EXAMPLES AND COMPUTATIONAL EXERCISES	153
	Introduction	153
6.1	Shooting; Lubrication Theory	153
	6.1.1 *Computing Exercise; Forced Flow*	160
6.2	Finite Differences; Biophysics	162
	6.2.1 $h \to 0$ *Extrapolation*	168
	6.2.2 *Computing Exercise; Nonlinear Diffusivity*	170
APPENDIX A	FUNCTION SPACE APPROXIMATION METHODS	173
A.1	Galerkin's Method	173
A.2	Collocation Methods	175
A.3	Generalized Ritz Methods	176
BIBLIOGRAPHY		178
INDEX		183
APPENDIX B	NUMERICAL SOLUTION OF TWO-POINT BOUNDARY-VALUE PROBLEMS	185
B.1	Shooting Methods	191
B.2	Finite Difference Methods	211
B.3	Eigenvalue Problems	229
B.4	Singular Problems	239
APPENDIX C	SOME FURTHER RESULTS	253
C.1	Newton's Method under Mild Differentiability Conditions	255
C.2	Approximation Methods for Nonlinear Problems with Application to Two-Point Boundary-Value Problems	269

C.3 Accurate Difference Methods for Linear Ordinary Differential Systems Subject to Linear Constraints 281

C.4 Accurate Difference Methods for Nonlinear Two-Point Boundary-Value Problems 305

C.5 Difference Methods for Boundary-Value Problems in Ordinary Differential Equations 321

C.6 A Numerical Method for Singular Two-Point Boundary-Value Problems 333

C.7 Numerical Solution of Bifurcation and Nonlinear Eigenvalue Problems 347

C.8 Shooting and Parallel Shooting Methods for Solving the Falkner-Skan Boundary-Layer Equation 373

C.9 The Von Karman Swirling Flows 385
