

AN INTRODUCTION TO
HARMONIC
ANALYSIS

Yitzhak Katznelson

INSTITUTE OF MATHEMATICS
THE HEBREW UNIVERSITY OF JERUSALEM

Second Corrected Edition

DOVER PUBLICATIONS, INC.
NEW YORK

Contents

<i>Chapter I</i>	Fourier Series on $\mathbf{T}$	1
	1. FOURIER COEFFICIENTS	2
	2. SUMMABILITY IN NORM AND HOMOGENEOUS BANACH SPACES ON $\mathbf{T}$	8
	3. POINTWISE CONVERGENCE OF $\sigma_n(f)$	17
	4. THE ORDER OF MAGNITUDE OF FOURIER COEFFICIENTS	22
	5. FOURIER SERIES OF SQUARE SUMMABLE FUNCTIONS	27
	6. ABSOLUTELY CONVERGENT FOURIER SERIES	31
	7. FOURIER COEFFICIENTS OF LINEAR FUNCTIONALS	34
<i>Chapter II</i>	The Convergence of Fourier Series	46
	1. CONVERGENCE IN NORM	46
	2. CONVERGENCE AND DIVERGENCE AT A POINT	51
	*3. SETS OF DIVERGENCE	55
<i>Chapter III</i>	The Conjugate Function and Functions Analytic in the Unit Disc	62
	1. THE CONJUGATE FUNCTION	62
	*2. THE MAXIMAL FUNCTION OF HARDY AND LITTLEWOOD	73
	*3. THE HARDY SPACES	81

<i>chapter IV</i>	Interpolation of Linear Operators and the Theorem of Hausdorff-Young	93
	1. INTERPOLATION OF NORMS AND OF LINEAR OPERATORS	93
	2. THE THEOREM OF HAUSDORFF-YOUNG	98
<i>chapter V</i>	Lacunary Series and Quasi-analytic Classes	104
	1. LACUNARY SERIES	104
	*2. QUASI-ANALYTIC CLASSES	112
<i>chapter VI</i>	Fourier Transforms on the Line	119
	1. FOURIER TRANSFORMS FOR $L^1(\mathbf{R})$	120
	2. FOURIER-STIELTJES TRANSFORMS	131
	3. FOURIER TRANSFORMS IN $L^p(\mathbf{R})$, $1 < p \leq 2$	139
	4. TEMPERED DISTRIBUTIONS AND PSEUDO-MEASURES	146
	5. ALMOST-PERIODIC FUNCTIONS ON THE LINE	155
	6. THE WEAK-STAR SPECTRUM OF BOUNDED FUNCTIONS	170
	7. THE PALEY-WIENER THEOREMS	173
	*8. THE FOURIER-CARLEMAN TRANSFORM	179
	9. KRONECKER'S THEOREM	181
<i>chapter VII</i>	Fourier Analysis on Locally Compact Abelian Groups	186
	1. LOCALLY COMPACT ABELIAN GROUPS	186
	2. THE HAAR MEASURE	187
	3. CHARACTERS AND THE DUAL GROUP	188
	4. FOURIER TRANSFORMS	190
	5. ALMOST-PERIODIC FUNCTIONS AND THE BOHR COMPACTIFICATION	191

Chapter VIII	Commutative Banach Algebras	194
1.	DEFINITION, EXAMPLES, AND ELEMENTARY PROPERTIES	194
2.	MAXIMAL IDEALS AND MULTIPLICATIVE LINEAR FUNCTIONALS	198
3.	THE MAXIMAL-IDEAL SPACE AND THE GELFAND REPRESENTATION	205
4.	HOMOMORPHISMS OF BANACH ALGEBRAS	213
5.	REGULAR ALGEBRAS	221
6.	WIENER'S GENERAL TAUBERIAN THEOREM	226
7.	SPECTRAL SYNTHESIS IN REGULAR ALGEBRAS	229
8.	FUNCTIONS THAT OPERATE IN REGULAR BANACH ALGEBRAS	235
9.	THE ALGEBRA $M(\mathbf{T})$ AND FUNCTIONS THAT OPERATE ON FOURIER-STIELTJES COEFFICIENTS	244
10.	THE USE OF TENSOR PRODUCTS	249
appendix	Vector-Valued Functions	257
	Bibliography	261
	Index	263
