## Contents

Preface	v
Acknowledgements	ix
List of contributors	xi

### I AUTOMORPHISMS AND PERMUTATION GROUPS

Models and groups	3
Examples of $\aleph_0$ -categorical structures David M. Evans	33
A survey of Jordan groups <b>Dugald Macpherson</b>	73
The structure of totally categorical structures <b>Wilfrid Hodges</b>	111
Permutations and the axiom of choice <b>J. K. Truss</b>	131
Relational structures and dimensions <b>Frank O. Wagner</b>	153
Bases in permutation groups <b>Peter J. Cameron</b>	181
Canonical expansions of countably categorical structures <b>Simon R. Thomas</b>	199
Some combinatorial aspects of the cover problem for totally categorical theories <b>A. A. Ivanov</b>	215
A generalization of Jordan groups <b>S. A. Adeleke</b>	233

## II RECURSIVELY SATURATED MODELS

Recursive saturation	243
Indiscernibles	
<b>Richard Kaye</b>	257
The small index property and recursively saturated models of Peano arithmetic	
<b>Daniel Lascar</b>	281
A Galois correspondence for countable recursively saturated models of Peano arithmetic	
<b>Richard Kaye</b>	293

## III PERMUTATION GROUPS OF FINITE MORLEY RANK

Stable groups	315
On generic normal subgroups	
<b>Alexandre V. Borovik and Simon R. Thomas</b>	319
On Frobenius groups of finite Morley rank I	
<b>Ali Nesin</b>	325
On Frobenius groups of finite Morley rank II	
<b>David Epstein and Ali Nesin</b>	341
Bibliography	351
Index of notation	369
Index	373
