Volume 4

Research in Collegiate Mathematics Education. I

Ed Dubinsky
Alan H. Schoenfeld
Jim Kaput
Editors

Thomas Dick
Managing Editor

American Mathematical Society
Providence, Rhode Island
in cooperation with
Mathematical Association of America
Washington, D. C.

CONTENTS

Preface	vii
<i>Ed Dubinsky, Jim Kaput, and Alan Schoenfeld</i>	
Some Notes on the Enterprise (Research in Collegiate Mathematics Education, That Is)	1
<i>Alan H. Schoenfeld</i>	
Students, Functions, and the Undergraduate Curriculum	21
<i>Patrick W. Thompson</i>	
On Understanding How Students Learn to Visualize Function Transformations	45
<i>Theodore Eisenberg and Tommy Dreyfus</i>	
Three Approaches to Undergraduate Calculus Instruction: Their Nature and Potential Impact on Students' Language Use and Sources of Conviction	69
<i>Sandra Frid</i>	
A Comparison of the Problem Solving Performance of Students in Lab Based and Traditional Calculus	101
<i>Jack Bookman and Charles P. Friedman</i>	
An Efficacy Study of the Calculus Workshop Model	117
<i>Martin Vern Bonsangue</i>	

The Case of Dan: Student Construction of a Functional Situation through Visual Attributes	139
<i>Stephen Monk and Ricardo Nemirouky</i>	
The Effect of the Graphing Calculator on Female Students' Spatial Visualization Skills and Level-of-Understanding in Elementary Graphing and Algebra Concepts	169
<i>Mary Margaret Shoaf-Grabb</i>	
To the Right of the "Decimal" Point: Preservice Teachers' Concepts of Place Value and Multidigit Structures	195
<i>Rina Zarkis and Helen Khoury</i>	
Twenty Questions about Research on Undergraduate Mathematics Education	225
<i>Lynn Arthur Steen</i>
