

Yulia E. Karpeshina

Perturbation Theory for the Schrödinger Operator with a Periodic Potential

Springer

Table of Contents

1	Introduction.	1
2	Perturbation Theory for a Polyharmonic Operator in the Case of $2l > n$	23
2.1	Introduction. Isoenergetic Surface of the Free operator. Lase Diffraction Conditions.	23
2.2	Analytic Perturbation Theory for the Nonsingular Set.	26
2.3	Construction of the Nonsingular Set.	31
2.4	Perturbation Series for the Singular Set.	38
2.5	Geometric Constructions for the Singular Set.	45
2.6	Proof of the Bethe-Sommerfeld Conjecture. Description of the Isoenergetic Surface.	53
2.7	Formulae for Eigenfunctions on the Isoenergetic Surface.	58
3	Perturbation Theory for the Polyharmonic Operator in the Case $4l > n + 1$	63
3.1	Introduction. Generalized Lase Diffraction Conditions.	63
3.2	Analytic Perturbation Theory for the Nonsingular Set.	66
3.3	The Case of a Smooth Potential.	72
3.4	Construction of the Nonsingular Set.	73
3.5	The Main Result of the Analytic Perturbation Theory in the Case of a Nonsmooth Potential.	80
3.6	Construction of the Nonsingular Set for a Nonsmooth Potential.	81
3.7	Proof of the Main Result in the Case of a Nonsmooth Potential.	86
3.8	Proof of the Bethe-Sommerfeld Conjecture. The Description of the Isoenergetic Surface.	90
3.9	Formulae for Eigenvalues on the Perturbed Isoenergetic Surface.	92
3.10	Determination of the Potential from the Asymptotic of the Eigenfunction.	95
4	Perturbation Theory for Schrödinger Operator with a Periodic Potential.	99
4.1	Introduction. Modified Lase Diffraction Conditions.	99
4.2	The Main Results for the Case of a Trigonometric Polynomial.	103
4.3	Preliminary Consideration.	107

4.4	Geometric Constructions.	115
4.5	Proof of the Main Results.	121
4.5.1	The operator $H_1(r)$ acting in l_2^+	121
4.5.2	The case of a "simple" potential.	122
4.5.3	The general case.	126
4.6	The Perturbation Formulae Near the Planes of Diffraction.	143
4.7	Proof of the Perturbation Formulae on the Singular Set.	149
4.8	Geometric Constructions on the Singular Set.	159
4.9	Appendices.	175
4.9.1	Appendix 1 (The Proof of Lemma 4.32).	175
4.9.2	Appendix 2.	177
4.9.3	Appendix 2A.	179
4.9.4	Appendix 3.	181
4.9.5	Appendix 3A.	184
4.9.6	Appendix 4 (Formulae in the cylindrical coordinates for Q_{ext}^k and $\tilde{Q}_{\text{ext}}^k$, $k > 1$).	185
4.9.7	Appendix 5.	186
4.9.8	Appendix 6.	187
4.9.9	Appendix 7.	189
4.9.10	Appendix 8.	190
4.10	The Main Results for a Nonsmooth Potential.	192
4.11	Geometric Constructions for a Nonsmooth Potential.	195
4.12	Proof of Convergence of the Perturbation Series.	197
4.13	The Description of the Isoenergetic Surface.	215
4.13.1	Proof of the Bethe-Sommerfeld conjecture.	215
4.13.2	The behavior of the isoenergetic surface near the nonsingular set.	216
4.13.3	The behavior of the isoenergetic surface in a vicinity of the singular set.	218
4.14	Formulae for the Eigenfunctions on the Isoenergetic Surface.	221
5	The Interaction of a Free Wave with a Semi-bounded Crystal.	233
5.1	Introduction.	233
5.2	A Boundary Operator.	238
5.3	Elimination of Surface and Quasimode States in the Plane Case.	245
5.4	Elimination of Surface and Quasimode States in the Three-Dimensional Case.	259
5.4.1	One dimensional semicrystal.	260
5.4.2	The case of a potential depending only on x_1	276
5.4.3	The general case $H_0 = -\Delta + V_0$	285
5.5	Geometric Constructions.	297
5.5.1	Geometric Construction for the Three-Dimensional Case.	297
5.5.2	Geometric Constructions in the Two-Dimensional Case.	310
5.6	Asymptotic Formulae for the Reflected and Refracted Waves.	313
5.7	Solution of the Inverse Problem.	325
