

Fundamentals of the Theory of Operator Algebras

Volume II: Advanced Theory

Richard V. Kadison
John R. Ringrose

Graduate Studies
in Mathematics

Volume 16

American Mathematical Society

CONTENTS

<u>Preface</u>	ix
<u>Contents of Volume I</u>	xiii

Chapter 6. Comparison Theory of Projection

<u>6.1. Polar decomposition and equivalence</u>	399
<u>6.2. Ordering</u>	405
<u>6.3. Finite and infinite projections</u>	411
<u>6.4. Abelian projections</u>	419
<u>6.5. Type decomposition</u>	422
<u>6.6. Type I algebras</u>	426
<u>6.7. Examples</u>	433
<u>6.8. Ideals</u>	441
<u>6.9. Exercises</u>	445

Chapter 7. Normal States and Unitary Equivalence of von Neumann Algebras

<u>7.1. Completely additive states</u>	454
<u>7.2. Vector states and unitary implementation</u>	465
<u>7.3. A second approach to normal states</u>	473
<u>7.4. The predual</u>	481
<u>7.5. Normal weights on von Neumann algebras</u>	485
<u>7.6. Exercises</u>	490

Chapter 8. The Trace

<u>8.1. Traces</u>	504
<u>8.2. The trace in finite algebras</u>	510
<u>8.3. The Dixmier approximation theorem</u>	520
<u>8.4. The dimension function</u>	530
<u>8.5. Tracial weights on factors</u>	537

8.6. Further examples of factors	546
<i>An operator-theoretic construction</i>	546
<i>Measure-theoretic examples</i>	553
8.7. Exercises	565

Chapter 9. Algebra and Commutant

9.1. The type of the commutant	585
9.2. Modular theory	591
<i>A first approach to modular theory</i>	593
<i>Tomita's theorem—a second approach</i>	625
<i>A further extension of modular theory</i>	639
9.3. Unitary equivalence of type I algebras	660
9.4. Abelian von Neumann algebras	665
9.5. Spectral multiplicity	670
9.6. Exercises	689

Chapter 10. Special Representation of C^* -Algebras

10.1. The universal representation	711
10.2. Irreducible representations	727
10.3. Disjoint representations	734
10.4. Examples	744
<i>Abelian C^*-algebras</i>	744
<i>Compact operators</i>	747
<i>$\mathcal{B}(\mathcal{H})$ and the Calkin algebra</i>	755
<i>Uniformly matricial algebras</i>	759
10.5. Exercises	766

Chapter 11. Tensor Products

11.1. Tensor products of represented C^* -algebras	800
11.2. Tensor products of von Neumann algebras	812
<i>Elementary properties</i>	812
<i>The commutation theorem</i>	821
<i>The type of tensor products</i>	829
<i>Tensor products of unbounded operators</i>	836
11.3. Tensor products of abstract C^* -algebras	846
<i>The spatial tensor product</i>	846
<i>C^*-norms on $\mathcal{A} \otimes \mathcal{B}$</i>	850
<i>Nuclear C^*-algebras</i>	858
11.4. Infinite tensor products of C^* -algebras	863
11.5. Exercises	877

Chapter 12. Approximation by Matrix Algebras

<u>12.1. Isomorphism of uniformly matricial algebras</u>	<u>890</u>
<u>12.2. The finite matricial factor</u>	<u>895</u>
<u>12.3. States and representations of matricial C^*-algebras</u>	<u>904</u>
<u>12.4. Exercises</u>	<u>920</u>

Chapter 13. Crossed Products

<u>13.1. Discrete crossed products</u>	<u>937</u>
<u>13.2. Continuous crossed products</u>	<u>957</u>
<u>13.3. Crossed products by modular automorphism groups</u>	<u>974</u>
<u>13.4. Exercises</u>	<u>989</u>

Chapter 14. Direct Integrals and Decompositions

<u>14.1. Direct integrals</u>	<u>999</u>
<u>14.2. Decompositions relative to abelian algebras</u>	<u>1025</u>
<u>14.3. Appendix—Borel mappings and analytic sets</u>	<u>1031</u>
<u>14.4. Exercises</u>	<u>1041</u>

<u>Bibliography</u>	<u>1049</u>
----------------------------	-------------

<u><i>Index of Notation</i></u>	<u>1055</u>
<u><i>Index</i></u>	<u>1061</u>
