INDEX

Insunt in hoc volumine indicis ENESTROEMIANI commentationes
456, 468, 469, 470, 478, 479, 525, 536, 568, 569, 585, 603, 607, 612, 627, 634, 641, 649, 658, 659, 682, 825

pag.

456. De pressione ponderis in planum cui incumbit 1
Novi commentarii academiae scientiarum Petropolitanae **18** (1773), 1774, p. 289–329.
Summarium ibidem p. 32–34

468. De oscillationibus minimis penduli quotcunque ponduculis onusti 35
Novi commentarii academiae scientiarum Petropolitanae **19** (1774), 1775, p. 285–301.
Summarium ibidem p. 38–39

469. De motu oscillatorio binarum lancium ex libra suspensarum . . . 51
Novi commentarii academiae scientiarum Petropolitanae **19** (1774), 1775, p. 302–324.
Summarium ibidem p. 39–42

470. Explicatio motus oscillatorii mirabilis in libra maiore observati 71
Novi commentarii academiae scientiarum Petropolitanae **19** (1774), 1775, p. 325–339.
Summarium ibidem p. 43–44

478. Formulae generales pro translatione quacunque corporum rigidorum 84
Novi commentarii academiae scientiarum Petropolitanae **20** (1775), 1776, p. 189–207.
Summarium ibidem p. 26–28

479. Nova methodus motum corporum rigidorum determinandi . . . 99
Novi commentarii academiae scientiarum Petropolitanae **20** (1775), 1776, p. 208–238.
Summarium ibidem p. 29–33

525. De motu oscillatorio mixto plurium pendulorum ex eodem corpore mobili suspensorum 126
Acta academiae scientiarum Petropolitanae 1779: I, 1782, p. 89–102

536. De proprietatibus triangulorum mechanicis 138
Acta academiae scientiarum Petropolitanae 1779: II, 1783, p. 126–155

pag.

568. De motu penduli circa axem cylindricum, fulcro datae figurae incumbentem, mobilis. Remota frictione 163
Acta academiae scientiarum Petropolitanae 1780: II, 1784, p. 133–163

569. De motu penduli circa axem cylindricum, fulcro datae figurae incumbentem, mobilis. Habita frictionis ratione 188
Acta academiae scientiarum Petropolitanae 1780: II, 1784, p. 164–174

585. De effectu frictionis in motu volutorio 197
Acta academiae scientiarum Petropolitanae 1781: II, 1785, p. 131–175

603. De descensu baculi super hypomochlio cylindro fixo delabentis . . 239
Acta academiae scientiarum Petropolitanae 1782: I, 1786, p. 117–156

607. De motu globi circa axem obliquum quemcunque gyrantis et super plano horizontali incedentis 271
Acta academiae scientiarum Petropolitanae 1782: II, 1786, p. 107–147

612. De motu globi heterogenei super plano horizontali, una cum dilucidationibus necessariis super motu vacillatorio 307
Nova acta academiae scientiarum Petropolitanae **1** (1783), 1787, p. 119–139. Summarium ibidem p. 229–232

627. Solutio problematis mechanici 328
Nova acta academiae scientiarum Petropolitanae **3** (1785), 1788, p. 142–148. Summarium ibidem p. 142

634. De motu oscillatorio tabulae suspensae et a vento agitatae. . . . 335
Nova acta academiae scientiarum Petropolitanae **4** (1786), 1789, p. 131–147. Summarium ibidem p. 120–121

641. De motu quodam maxime memorabili, satis quidem simplici, at solutu difficillimo 352
Nova acta academiae scientiarum Petropolitanae **5** (1787), 1789, p. 149–175. Summarium ibidem p. 74–75

649. De motu oscillatorio penduli circa axem cylindricum plano horizontali incumbentem 379
Nova acta academiae scientiarum Petropolitanae **6** (1788), 1790, p. 145–153. Summarium ibidem p. 93–94

pag.

658. De momentis virium respectu axis cuiuscunque inveniendis; ubi plura insignia symptomata circa binas rectas, non in eodem plano sitas, explicantur 387

Nova acta academiae scientiarum Petropolitanae 7 (1789), 1793, p. 191–204. Summarium ibidem p. 47–48

659. Methodus facilis omnium virium momenta respectu axis cuiuscunque determinandi 399

Nova acta academiae scientiarum Petropolitanae 7 (1789), 1793, p. 205–214. Summarium ibidem p. 48

682. Von dem Drucke eines mit einem Gewichte beschwerten Tisches auf einer Fläche. Aus den Papieren des sel. Leonhard Euler gezogen von Jakob Bernoulli 407

Archiv der reinen und angewandten Mathematik 1:1, 1794, p. 74–80

825. De motu corporum circa punctum fixum mobilium 413

Opera postuma 2, 1862, p. 43–62
