

John Hunt

Java and Object Orientation: An Introduction

Springer

John Hunt, BSc, PhD, MBCS, CEng
Department of Computer Science, University of Wales,
Aberystwyth, Ceredigion SY23 3DB, UK

Series Editors

Professor Peter J. Thomas, BA (Hons), PhD, AIMgt, FRSA, FVRS
Centre for Personal Information Management, University of the West of
England, Coldharbour Lane, Bristol, BS16 1QY, UK

Professor Ray J. Paul, BSc, MSc, PhD
Department of Computer Science and Information Systems at St. John's,
Brunel University, Kingston Lane, Uxbridge, Middlesex UB8 3PH, UK

ISBN-13: 978-3-540-76201-0

Contents

Preface	vii
Part 1: Introduction to Object Orientation	1
1 Introduction to Object Orientation.....	3
1.1 Introduction	3
1.2 Programming Paradigms	3
1.3 Revolution versus Evolution	5
1.4 Why Learn a New Programming Paradigm?	6
1.5 Pedigree of Object Oriented Languages	14
1.6 Fundamentals of Object Orientation	15
1.7 The Basic Principles of Object Orientation.....	16
1.8 Encapsulation.....	17
1.9 Inheritance	19
1.10 Abstraction	21
1.11 Polymorphism.....	22
1.12 Summary.....	24
1.13 Further Reading	25
2 Elements of Object Orientation.....	27
2.1 Introduction	27
2.2 Terminology	27
2.3 Types of Hierarchy	29
2.4 The Move to Object Technology	32
2.5 Summary.....	32
2.6 Exercises	33
2.7 Further Reading	33
3 Constructing an Object Oriented System	35
3.1 Introduction	35
3.2 The Application: Windscreen Wipe Simulation.....	35
3.3 Where Do We Start?	36
3.4 Identifying the Objects	37

3.5	Identifying the Services or Methods	38
3.6	Refining the Objects	40
3.7	Bringing It All Together	40
3.8	Where Is the Structure?	43
3.9	Summary.....	46
3.10	Exercises.....	46
3.11	Further Reading	46
Part 2: Introduction to the Java Language.....		47
4	A Brief History of Time, the Universe and Java.....	49
4.1	Introduction	49
4.2	What Is Java?	49
4.3	Objects in Java	50
4.4	History.....	51
4.5	Commercial Versions of Java	52
4.6	The Java Environment.....	53
4.7	Further Reading	56
5	A Little Java.....	57
5.1	Introduction	57
5.2	Setting Up the Development Environment.....	58
5.3	Compiling and Executing Java	59
5.4	Using the Java Debugger	60
5.5	Using the Java Documentation Tool.....	64
5.6	Summary.....	65
5.7	Further Reading	65
6	Java Building Blocks	67
6.1	Introduction	67
6.2	The Basics of the Language	67
6.3	Classes	69
6.4	Method Definitions.....	79
6.5	Interface Definitions.....	83
7	Java Constructs.....	87
7.1	Introduction	87
7.2	Numbers and Numeric Operators.....	87
7.3	Characters and Strings	89
7.4	Assignments	91
7.5	Variables	92
7.6	Messages and Message Selectors	95
7.7	Summary.....	96

7.8	Further Reading.....	97
8	An Example Java Class	99
8.1	Introduction	99
8.2	Defining a Class.....	99
8.3	Defining a Method	100
8.4	Creating an Instance.....	103
Part 3: Java and Object Orientation		105
9	Classes, Inheritance and Abstraction.....	107
9.1	Introduction	107
9.2	Classes Revisited	107
9.3	Inheritance in Classes.....	111
9.4	Abstract Classes	114
9.5	Constructors and their Use.....	116
9.6	The Main Method	117
10	Encapsulation and Polymorphism.....	119
10.1	Introduction	119
10.2	Encapsulation.....	119
10.3	Packages.....	121
10.4	Polymorphism.....	124
11	Data Structures.....	127
11.1	Introduction	127
11.2	Data Structure Classes.....	127
11.3	The Abstract Class Dictionary.....	128
11.4	The HashTable Class	128
11.5	The Vector Class	130
11.6	The Stack Class.....	134
11.7	A Queue Class.....	134
11.8	Enumeration.....	135
11.9	Arrays.....	135
11.10	Memory Management	139
11.11	Summary.....	142
11.12	Further Reading.....	142
12	Defining Collection Classes.....	143
12.1	Introduction	143
12.2	The Design of the Collection Classes	143
12.3	The Collections Interface	144
12.4	The Abstract GrowableCollection Class	145

12.5	The Set Class.....	146
12.6	Using a Set	146
12.7	The Abstract FixedCollection Class	147
12.8	The SortedCollection Class	149
12.9	Using a Sorted Collection.....	150
Part 4:	Further Java	153
13	Control and Iteration.....	155
13.1	Introduction	155
13.2	Control Structures	155
13.3	Iteration	160
13.4	Recursion.....	163
13.5	Summary.....	163
14	An Object Oriented Organizer.....	165
14.1	Introduction	165
14.2	The Organizer Class.....	165
14.3	The Class Definition	166
14.4	The Updating Protocol.....	166
14.5	The Accessing Protocol.....	167
14.6	The Main Method	168
14.7	Exercise – the Financial Manager Project	170
15	Streams and Files	171
15.1	Introduction	171
15.2	Streams.....	171
15.3	Accessing a File	178
15.4	Example: Reading a File	182
15.5	Example: Writing a File.....	184
15.6	Reading Input from the Console.....	186
15.7	Summary.....	186
16	Serialization	187
16.1	Introduction	187
16.2	The ObjectOutputStream Class	189
16.3	The ObjectInputStream Class.....	190
16.4	The Serializable Interface.....	190
16.5	A Simple Serialization Application.....	191
16.6	Exercise – Using Files with the Financial Manager	196
16.7	Summary.....	198
17	Observers and Observables.....	199

17.1	Introduction	199
17.2	The Dependency Mechanism	199
17.3	The Observer Interface.....	205
17.4	Extending the Dependency Example.....	206
17.5	Exercise – Dependency and the Financial Manager	208
17.6	Summary.....	208
Part 5: Graphical Interfaces and Applets.....		209
18	Graphic Programming Using the AWT	211
18.1	Introduction	211
18.2	Windows as Objects.....	211
18.3	Windows in Java	212
18.4	The Abstract Window Toolkit.....	213
18.5	The Component Class	215
18.6	The Container Class.....	216
18.7	The Panel Class	217
18.8	The Frame Class.....	217
18.9	The Graphics Class	219
18.10	A Worked Graphical Application	222
18.11	Further Reading	225
19	User Interface Programming	227
19.1	Introduction	227
19.2	The Event Delegation Model	227
19.3	GUI Component Classes	231
19.4	Additional AWT Classes	238
20	Managing Component Layout.....	239
20.1	Introduction	239
20.2	The FlowLayout Manager	239
20.3	The BorderLayout Manager.....	241
20.4	The GridLayout Manager.....	242
20.5	The GridBagLayout Manager	243
20.6	The CardLayout Manager	246
20.7	A Simple GUI Example.....	246
21	A GUI Case Study.....	249
21.1	Introduction	249
21.2	The Class Structure.....	252
21.3	The Instance Structure	261
21.4	Exercise – a GUI for the Financial Manager	261
21.5	Summary.....	262

21.6	Further Reading	262
22	Combining Graphics and GUI Components	263
22.1	Introduction	263
22.2	The JavaDraw Application	263
22.3	The Structure of the Application.....	264
22.4	The Interactions between Objects.....	267
22.5	The Classes.....	271
22.6	Exercises.....	287
22.7	Summary.....	288
23	Applets and the Internet	289
23.1	Introduction	289
23.2	Applet Security.....	290
23.3	The Applet Class	291
23.4	Working with Applets	292
23.5	The Account Applet.....	293
23.6	A Brief Introduction to HTML	295
23.7	The Applet HTML Tag	295
23.8	Accessing HTML Files	298
23.9	Network Programming	299
23.10	Summary.....	301
23.11	Further Reading	301
Part 6:	Java Development	303
24	Java Style Guidelines.....	305
24.1	Introduction	305
24.2	Code Layout.....	305
24.3	Variables	306
24.4	Classes	309
24.5	Interfaces	312
24.6	Enumerated Types.....	312
24.7	Methods	313
24.8	Scoping.....	317
24.9	Statement Labels	318
25	Exception Handling	319
25.1	Introduction	319
25.2	What Is an Exception?	319
25.3	What Is Exception Handling?	320
25.4	Throwing an Exception.....	322
25.5	Catching an Exception	323

25.6	Defining an Exception.....	326
26	Concurrency	329
26.1	Introduction	329
26.2	Concurrent Processes	329
26.3	Threads	330
26.4	The Thread Class	332
26.5	A Time Slicing Example	335
Part 7:	Object Oriented Design	341
27	Object Oriented Analysis and Design	343
27.1	Introduction	343
27.2	Object Oriented Design Methods.....	343
27.3	Object Oriented Analysis	344
27.4	The Booch Method	345
27.5	The Object Modeling Technique	346
27.6	The Objectory Method	348
27.7	The Fusion Method.....	349
27.8	The Unified Modeling Language.....	351
27.9	Summary.....	351
28	The Unified Modeling Language	353
28.1	Introduction	353
28.2	The Meta-Model.....	354
28.3	The Models	355
28.4	Use Case Diagrams	356
28.5	The Object Model.....	357
28.6	Packages.....	365
28.7	Sequence Diagrams.....	366
28.8	Collaboration Diagrams	367
28.9	State Machine Diagrams	370
28.10	Deployment Diagrams	373
28.11	Summary.....	374
29	The Object Modeling Technique	375
29.1	Introduction	375
29.2	The Methodology.....	375
29.3	Use Case Analysis	376
29.4	Analysis Phase.....	379
29.5	Design Phase.....	393
29.6	Implementation Phase	399
29.7	Summary.....	399

Part 8: The Future.....	401
30 Areas of Java and Object Technology not Covered	403
30.1 Introduction	403
30.2 Language Areas	403
30.3 Java Virtual Machine	406
30.4 Security and Signed Applets	406
30.5 Java Beans	408
30.6 Remote Method Invocation	409
30.7 Java Database Connectivity	410
30.8 Java and C++.....	410
30.9 CORBA	411
30.10 Object Oriented Databases.....	413
31 The Future for Object Technology	415
31.1 Introduction	415
31.2 The Java Language	415
31.3 The Web and Objects.....	419
31.4 Object Oriented Databases and the Web.....	420
31.5 JavaStation, JavaOS and HotJava Views.....	420
31.6 Java as a Training Language	423
31.7 Object Technology: the Next Five Years.....	424
Appendix A: The Java API Packages	427
Appendix B: The java.lang Package	429
Appendix C: The java.util Package	433
Appendix D: The java.io Package	437
Appendix E: The java.awt Package	443
Appendix F: The java.awt.event Package.....	449
Appendix G: The java.awt.image Package	453
Appendix H: The Java Keywords	455
References	457
Index	463
