

Edwin Hewitt   Kenneth A. Ross

# Abstract Harmonic Analysis

Volume II

Structure and Analysis for Compact Groups

Analysis on Locally Compact Abelian Groups

Springer-Verlag

Berlin Heidelberg New York

London Paris Tokyo

Hong Kong Barcelona

Budapest

## Table of Contents

|                                                                                       |     |
|---------------------------------------------------------------------------------------|-----|
| Preface . . . . .                                                                     | VII |
| Chapter Seven: Representations and duality of compact groups . . . . .                | 1   |
| Section 27. Unitary representations of compact groups . . . . .                       | 1   |
| Section 28. More about representations of compact groups . . . . .                    | 60  |
| Section 29. Miscellaneous facts about representations . . . . .                       | 113 |
| Section 30. The TANNAKA-KRONECKER duality theorem . . . . .                           | 156 |
| Chapter Eight: Fourier transforms . . . . .                                           | 209 |
| Section 31. $\mathcal{Q}_1$ and $\mathcal{Q}_0$ transforms . . . . .                  | 209 |
| Section 32. Positive-definite functions and factorization theorems . . . . .          | 251 |
| Section 33. BOCHNER's theorem . . . . .                                               | 291 |
| Chapter Nine: Analysis on compact groups . . . . .                                    | 323 |
| Section 34. Absolutely convergent Fourier series on compact groups . . . . .          | 323 |
| Section 35. Multipliers over compact groups . . . . .                                 | 367 |
| Section 36. More on multipliers over compact groups . . . . .                         | 390 |
| Section 37. Lacunarity for compact groups . . . . .                                   | 415 |
| Section 38. Ideal theory for certain convolution algebras on compact groups . . . . . | 449 |
| Chapter Ten: Spectral synthesis . . . . .                                             | 484 |
| Section 39. Ideals in regular commutative Banach algebras . . . . .                   | 484 |
| Section 40. Preliminaries on spectral sets . . . . .                                  | 522 |
| Section 41. Some special sets . . . . .                                               | 552 |
| Section 42. The failure of spectral synthesis in $\mathcal{Q}_1(G)$ . . . . .         | 576 |
| Chapter Eleven: Miscellany . . . . .                                                  | 606 |
| Section 43. $\mathcal{Q}_0$ transforms and maximal functions . . . . .                | 606 |
| Section 44. Pointwise summability for Fourier transforms . . . . .                    | 631 |
| Appendix D: Tensor products and von Neumann norms . . . . .                           | 680 |
| Appendix E: Miscellaneous facts from functional analysis . . . . .                    | 710 |
| Addendum to Volume I . . . . .                                                        | 726 |
| Bibliography . . . . .                                                                | 729 |
| Index of symbols . . . . .                                                            | 752 |
| Index of authors and terms . . . . .                                                  | 756 |
