

MATHEMATICAL WORLD • VOLUME 13

American Mathematical Society

TABLE OF CONTENTS

Preface	xi
Chapter 1. Introduction	1
Chapter 2. The formal definitions	13
Chapter 3. Optimal responses to specific strategies	25
Chapter 4. The maximin strategy	35
Chapter 5. The minimax strategy	45
Chapter 6. Solutions of zero-sum games	53
Chapter 7. $2 \times n$ and $m \times 2$ games	71
Chapter 8. Dominance	83
Chapter 9. Symmetric games	89
Chapter 10. Poker-like games	97
Chapter 11. Pure maximin and minimax strategies	115
Chapter 12. Pure nonzero-sum games	121
Chapter 13. Mixed strategies for nonzero-sum games	135
Chapter 14. Finding mixed Nash equilibria for 2×2 nonzero-sum games	155

Bibliography	169
Solutions to selected exercises	171
Index	175
