

ITERATION THEORY
OF HOLOMORPHIC MAPS
ON TAUT MANIFOLDS

MARCO ABATE

CONTENTS

PART 1

ONE COMPLEX VARIABLE

CHAPTER	1.1	SCHWARZ'S LEMMA AND RIEMANN SURFACES	3
	1.1.1	The Poincaré metric	4
	1.1.2	Fixed points of automorphisms	12
	1.1.3	Riemann surfaces	16
	1.1.4	Hyperbolic Riemann surfaces and Montel's theorem	28
	1.1.5	Boundary behavior of the universal covering map	35
		Notes	42
CHAPTER	1.2	BOUNDARY SCHWARZ'S LEMMAS	45
	1.2.1	Julia's lemma and angular derivatives	46
	1.2.2	Wolf's lemma and hyperbolic Riemann surfaces	61
		Notes	70
CHAPTER	1.3	ITERATION THEORY	73
	1.3.1	The fixed point case	74
	1.3.2	The Wolff-Denjoy theorem	78
	1.3.3	Hyperbolic Riemann surfaces and multiply connected domains	81
	1.3.4	Common fixed points	89
		Notes	96
CHAPTER	1.4	ONE-PARAMETER SEMIGROUPS	99
	1.4.1	The infinitesimal generator	100
	1.4.2	One-parameter semigroups on the unit disk	106
	1.4.3	One-parameter semigroups on Riemann surfaces	116
		Notes	119

PART 2
SEVERAL COMPLEX VARIABLES

CHAPTER	2.1	TAUT MANIFOLD	123
	2.1.1	Definitions and examples	124
	2.1.2	Function theory on taut manifolds	134
	2.1.3	Limit points of iterates	143
		Notes	149
CHAPTER	2.2	THE BALL	151
	2.2.1	The automorphism group	152
	2.2.2	Schwarz's lemma and horospheres	160
	2.2.3	Korányi regions and the Lindelöf theorem	168
	2.2.4	Angular derivatives	174
	2.2.5	Iteration theory and common fixed points in the ball	183
		Notes	190
CHAPTER	2.3	INVARIANT OBJECTS	192
	2.3.1	Invariant distances	193
	2.3.2	Invariant metrics	205
	2.3.3	Invariant volume forms	213
	2.3.4	The Kobayashi distance in convex domains	222
	2.3.5	Boundary behavior of the Kobayashi distance	224
	2.3.6	Localization at the boundary	238
		Notes	251
CHAPTER	2.4	AGAIN ITERATION THEORY	254
	2.4.1	Taut manifolds	255
	2.4.2	Horospheres	261
	2.4.3	Convex domains	274
		Notes	279
CHAPTER	2.5	COMMON FIXED POINTS	282
	2.5.1	Compact groups of automorphisms	282
	2.5.2	Fixed point sets	288
	2.5.3	One-parameter semigroups	293
		Notes	301
CHAPTER	2.6	COMPLEX GEODESICS	303
	2.6.1	Definitions and examples	304
	2.6.2	An extremal problem	309

	2.6.3	Convex domains	313
	2.6.4	Strongly convex domains	323
	2.6.5	Boundary smoothness	333
		Notes	347
CHAPTER	2.7	ANGULAR DERIVATIVES	350
	2.7.1	K -regions	351
	2.7.2	The Lindelöf theorem	356
	2.7.3	The Julia-Wolff-Carathéodory theorem in strongly convex domains	365
		Notes	380
