# Zeta Functions of Groups and Rings

 Springer

---

## Contents

<b>1</b>	<b>Introduction</b>	1
1.1	A Brief History of Zeta Functions	1
1.1.1	Euler, Riemann	1
1.1.2	Erichlet	3
1.1.3	Dedekind	4
1.1.4	Artin, Weil	5
1.1.5	Birch, Swinnerton-Dyer	6
1.2	Zeta Functions of Groups	6
1.2.1	Zeta Functions of Algebraic Groups	7
1.2.2	Zeta Functions of Rings	9
1.2.3	Local Functional Equations	10
1.2.4	Uniformity	11
1.2.5	Analytic Properties	12
1.3	$p$ -Adic Integrals	14
1.4	Natural Boundaries of Euler Products	16
<b>2</b>	<b>Nilpotent Groups: Explicit Examples</b>	21
2.1	Calculating Zeta Functions of Groups	21
2.2	Calculating Zeta Functions of Lie Rings	23
2.2.1	Constructing the Conz Integral	23
2.2.2	Resolution	25
2.2.3	Evaluating Monomial Integrals	31
2.2.4	Summing the Rational Functions	32
2.3	Explicit Examples	32
2.4	Free Abelian Lie Rings	33
2.5	Heisenberg Lie Ring and Variants	34
2.6	Grassman's Lie Rings	38
2.7	Free Class-2 Nilpotent Lie Rings	40
2.7.1	Three Generators	40
2.7.2	$n$ Generators	43
2.8	The 'Elliptic Curve Example'	42

**X Contents**

2.0	Other Class Two Examples	43
2.10	The Maximal Class Lie Ring $M_4$ and Variants	45
2.11	Lie Rings with Large Abelian Ideals	48
2.12	$F_{1,2}$	51
2.13	The Maximal Class Lie Rings $M_6$ and $Fl_6$	52
2.14	Nilpotent Lie Algebras of Dimension $\leq 6$	55
2.15	Nilpotent Lie Algebras of Dimension 7	62
<b>3</b>	<b>Soluble Lie Rings</b>	<b>69</b>
3.1	Introduction	69
3.2	Proof of Theorem 3.1	71
3.2.1	Choosing a Basis for $\mathfrak{u}_n(\mathbb{Z})$	71
3.2.2	Determining the Conditions	72
3.2.3	Constructing the Zeta Function	74
3.2.4	Transforming the Conditions	74
3.2.5	Deducing the Functional Equation	75
3.3	Explicit Examples	77
3.4	Variations	78
3.4.1	Quotients of $\mathfrak{u}_n(\mathbb{Z})$	78
3.4.2	Counting All Subrings	82
<b>4</b>	<b>Local Functional Equations</b>	<b>83</b>
4.1	Introduction	83
4.2	Algebraic Groups	83
4.3	Nilpotent Groups and Lie Rings	83
4.4	The Conjecture	84
4.5	Special Cases Known to Hold	85
4.6	A Special Case of the Conjecture	87
4.6.1	Projectivisation	88
4.6.2	Resolution	89
4.6.3	Manipulating the Cone Sums	91
4.6.4	Coxs and Schenck	93
4.6.5	Quasi-Good Sets	95
4.6.6	Quasi-Good Sets: The Monomial Case	97
4.7	Applications of Conjecture 4.5	98
4.8	Counting Subrings and $p$ -Subrings	102
4.9	Counting Ideals and $p$ -Ideals	108
4.9.1	Heights, Cocentral Bases and the $r$ -Map	104
4.9.2	Property (†)	107
4.9.3	Lie Rings Without (†)	119

<b>5</b>	<b>Natural Boundaries I: Theory</b> .....	121
5.1	A Natural Boundary for $\zeta_{\Omega, \beta}(s)$ .....	121
5.2	Natural Boundaries for Euler Products .....	123
5.2.1	Practicalities .....	134
5.2.2	Distinguishing Types I, II and III .....	136
5.3	Avoiding the Riemann Hypothesis .....	139
5.4	All Local Zeros on or to the Left of $\Re(s) = \beta$ .....	142
5.4.1	Using Riemann Zeros .....	143
5.4.2	Avoiding Rational Independence of Riemann Zeros .....	145
5.4.3	Continuation with Finitely Many Riemann Zeta Functions .....	149
5.4.4	Infinite Products of Riemann Zeta Functions .....	159
<b>6</b>	<b>Natural Boundaries II: Algebraic Groups</b> .....	155
6.1	Introduction .....	155
6.2	$G = \mathrm{GO}_{2k+1}$ of Type $B_k$ .....	159
6.3	$G = \mathrm{GSp}_{2k}$ of Type $C_k$ or $G = \mathrm{GO}_{2k}^*$ of Type $D_k$ .....	161
6.3.1	$G = \mathrm{GSp}_{2k}$ of Type $C_k$ .....	162
6.3.2	$G = \mathrm{GO}_{2k}^*$ of Type $D_k$ .....	165
<b>7</b>	<b>Natural Boundaries III: Nilpotent Groups</b> .....	169
7.1	Introduction .....	169
7.2	Zeta Functions with Meromorphic Continuation .....	169
7.3	Zeta Functions with Natural Boundaries .....	170
7.3.1	Type I .....	171
7.3.2	Type II .....	171
7.3.3	Type III .....	173
7.4	Other Types .....	177
7.4.1	Types IIIa and IIIb .....	177
7.4.2	Types IV, V and VI .....	177
<b>A</b>	<b>Large Polynomials</b> .....	179
A.1	$N^k$ , Counting Ideals .....	179
A.2	$\mathfrak{P}_{k,4}$ , Counting All Subrings .....	180
A.3	$\mathfrak{F}_k$ , Counting All Subrings .....	180
A.4	$L_{(3,2,2)}$ , Counting Ideals .....	181
A.5	$G_7 \times \mathfrak{P}_{7,7}$ , Counting Ideals .....	182
A.6	$\mathfrak{P}_{8,13}$ , Counting All Subrings .....	183
A.7	$\mathfrak{P}_{13,20}$ , Counting Ideals .....	184
A.8	$\mathfrak{P}_{16,74}$ , Counting Ideals .....	185
A.9	$\mathfrak{P}_{16,79}$ , Counting Ideals .....	187
A.10	$\mathfrak{P}_7(\mathbb{Z})$ , Counting Ideals .....	188
A.11	$\mathfrak{P}_7(\mathbb{Z})$ , Counting Ideals .....	188

XII Contents

B Factorisation of Polynomials Associated to Classical Groups .....	191
References .....	201
Index .....	205
Index of Notation .....	207
