<i>Preface</i>	<i>page ix</i>
Introduction	1
1 Overview of count response models	8
1.1 Varieties of count response model	8
1.2 Estimation	13
1.3 Fit considerations	15
1.4 Brief history of the negative binomial	15
1.5 Summary	17
2 Methods of estimation	19
2.1 Derivation of the IRLS algorithm	19
2.2 Newton–Raphson algorithms	28
2.3 The exponential family	33
2.4 Residuals for count response models	34
2.5 Summary	36
3 Poisson regression	39
3.1 Derivation of the Poisson model	39
3.2 Parameterization as a rate model	45
3.3 Testing overdispersion	46
3.4 Summary	48
4 Overdispersion	51
4.1 What is overdispersion?	51
4.2 Handling apparent overdispersion	52
4.3 Methods of handling real overdispersion	61
4.4 Summary	74

5	Negative binomial regression	77
5.1	Varieties of negative binomial	77
5.2	Derivation of the negative binomial	79
5.3	Negative binomial distributions	84
5.4	Algorithms	90
5.5	Summary	96
6	Negative binomial regression: modeling	99
6.1	Poisson versus negative binomial	99
6.2	Binomial versus count models	103
6.3	Examples: negative binomial regression	107
6.4	Summary	131
7	Alternative variance parameterizations	136
7.1	Geometric regression	137
7.2	NB-I: The linear constant model	143
7.3	NB-H: Heterogeneous negative binomial regression	149
7.4	The NB-P model	151
7.5	Generalized Poisson regression	154
7.6	Summary	158
8	Problems with zero counts	160
8.1	Zero-truncated negative binomial	160
8.2	Negative binomial with endogenous stratification	164
8.3	Hurdle models	167
8.4	Zero-inflated count models	173
8.5	Summary	177
9	Negative binomial with censoring, truncation, and sample selection	179
9.1	Censored and truncated models – econometric parameterization	179
9.2	Censored poisson and NB-2 models – survival parameterization	186
9.3	Sample selection models	191
9.4	Summary	195
10	Negative binomial panel models	198
10.1	Unconditional fixed-effects negative binomial model	199
10.2	Conditional fixed-effects negative binomial model	203
10.3	Random-effects negative binomial	208
10.4	Generalized estimating equation	215

10.5	Multilevel negative binomial models	226
10.6	Summary	230
	<i>Appendix A: Negative binomial log-likelihood functions</i>	233
	<i>Appendix B: Deviance functions</i>	236
	<i>Appendix C: Stata negative binomial – ML algorithm</i>	237
	<i>Appendix D: Negative binomial variance functions</i>	239
	<i>Appendix E: Data sets</i>	240
	<i>References</i>	242
	<i>Author index</i>	247
	<i>Subject index</i>	249
