

# *Time Series Analysis*

James D. Hamilton

PRINCETON UNIVERSITY PRESS  
PRINCETON, NEW JERSEY

# *Contents*

PREFACE viii

---

<b>1</b>	<i>Difference Equations</i>	<b>I</b>
1.1.	First-Order Difference Equations	1
1.2.	$p$ th-Order Difference Equations	7
APPENDIX I.A. <i>Proofs of Chapter 1 Propositions</i> 21		
References 24		
<b>2</b>	<i>Lag Operators</i>	<b>25</b>
2.1.	Introduction	25
2.2.	First-Order Difference Equations	27
2.3.	Second-Order Difference Equations	29
2.4.	$p$ th-Order Difference Equations	33
2.5.	Initial Conditions and Unbounded Sequences	36
References 42		
<b>3</b>	<i>Stationary ARMA Processes</i>	<b>43</b>
3.1.	Expectations, Stationarity, and Ergodicity	43
3.2.	White Noise	47
3.3.	Moving Average Processes	48
3.4.	Autoregressive Processes	53
3.5.	Mixed Autoregressive Moving Average Processes	59

---

3.6.	The Autocovariance-Generating Function	61
3.7.	Invertibility	64

**APPENDIX 3.A. Convergence Results for Infinite-Order  
Moving Average Processes 69**  
**Exercises 70      References 71**

---

<b>4</b>	<b><i>Forecasting</i></b>	<b>72</b>
4.1.	Principles of Forecasting	72
4.2.	Forecasts Based on an Infinite Number of Observations	77
4.3.	Forecasts Based on a Finite Number of Observations	85
4.4.	The Triangular Factorization of a Positive Definite Symmetric Matrix	87
4.5.	Updating a Linear Projection	92
4.6.	Optimal Forecasts for Gaussian Processes	100
4.7.	Sums of ARMA Processes	102
4.8.	Wold's Decomposition and the Box-Jenkins Modeling Philosophy	108
<b>APPENDIX 4.A. Parallel Between OLS Regression and Linear Projection 113</b>		
<b>APPENDIX 4.B. Triangular Factorization of the Covariance Matrix for an MA(1) Process 114</b>		
<b>Exercises 115      References 116</b>		
<b>5</b>	<b><i>Maximum Likelihood Estimation</i></b>	<b>117</b>
5.1.	Introduction	117
5.2.	The Likelihood Function for a Gaussian AR(1) Process	118
5.3.	The Likelihood Function for a Gaussian AR( $p$ ) Process	123
5.4.	The Likelihood Function for a Gaussian MA(1) Process	127
5.5.	The Likelihood Function for a Gaussian MA( $q$ ) Process	130
5.6.	The Likelihood Function for a Gaussian ARMA( $p, q$ ) Process	132
5.7.	Numerical Optimization	133

- 5.8. Statistical Inference with Maximum Likelihood Estimation 142  
5.9. Inequality Constraints 146

APPENDIX 5.A. *Proofs of Chapter 5 Propositions* 148  
*Exercises* 150      *References* 150

---

**6 Spectral Analysis** 152

- 6.1. The Population Spectrum 152  
6.2. The Sample Periodogram 158  
6.3. Estimating the Population Spectrum 163  
6.4. Uses of Spectral Analysis 167

APPENDIX 6.A. *Proofs of Chapter 6 Propositions* 172  
*Exercises* 178      *References* 178

---

**7 Asymptotic Distribution Theory** 180

- 7.1. Review of Asymptotic Distribution Theory 180  
7.2. Limit Theorems for Serially Dependent Observations 186

APPENDIX 7.A. *Proofs of Chapter 7 Propositions* 195  
*Exercises* 198      *References* 199

---

**8 Linear Regression Models** 200

- 8.1. Review of Ordinary Least Squares with Deterministic Regressors and i.i.d. Gaussian Disturbances 200  
8.2. Ordinary Least Squares Under More General Conditions 207  
8.3. Generalized Least Squares 220

APPENDIX 8.A. *Proofs of Chapter 8 Propositions* 228  
*Exercises* 230      *References* 231

---

**9 Linear Systems of Simultaneous Equations** 233

- 9.1. Simultaneous Equations Bias 233  
9.2. Instrumental Variables and Two-Stage Least Squares 238

---

9.3.	Identification	243
9.4.	Full-Information Maximum Likelihood Estimation	247
9.5.	Estimation Based on the Reduced Form	250
9.6.	Overview of Simultaneous Equations Bias	252

APPENDIX 9.A. *Proofs of Chapter 9 Propositions* 253

Exercise 255      References 256

---

<b>10</b>	<i>Covariance-Stationary Vector Processes</i>	257
-----------	-----------------------------------------------	-----

10.1.	Introduction to Vector Autoregressions	257
10.2.	Autocovariances and Convergence Results for Vector Processes	261
10.3.	The Autocovariance-Generating Function for Vector Processes	266
10.4.	The Spectrum for Vector Processes	268
10.5.	The Sample Mean of a Vector Process	279

APPENDIX 10.A. *Proofs of Chapter 10 Propositions* 285

Exercises 290      References 290

---

<b>11</b>	<i>Vector Autoregressions</i>	291
-----------	-------------------------------	-----

11.1.	Maximum Likelihood Estimation and Hypothesis Testing for an Unrestricted Vector Autoregression	291
11.2.	Bivariate Granger Causality Tests	302
11.3.	Maximum Likelihood Estimation of Restricted Vector Autoregressions	309
11.4.	The Impulse-Response Function	318
11.5.	Variance Decomposition	323
11.6.	Vector Autoregressions and Structural Econometric Models	324
11.7.	Standard Errors for Impulse-Response Functions	336

APPENDIX 11.A. *Proofs of Chapter 11 Propositions* 349

APPENDIX 11.B. *Calculation of Analytic Derivatives* 344

Exercises 348      References 349

---

<b>12</b>	<i>Bayesian Analysis</i>	<b>351</b>
12.1.	Introduction to Bayesian Analysis	351
12.2.	Bayesian Analysis of Vector Autoregressions	360
12.3.	Numerical Bayesian Methods	362
APPENDIX 12.A. <i>Proofs of Chapter 12 Propositions</i> 366		
	Exercise 370	References 370
<b>13</b>	<i>The Kalman Filter</i>	<b>372</b>
13.1.	The State-Space Representation of a Dynamic System	372
13.2.	Derivation of the Kalman Filter	377
13.3.	Forecasts Based on the State-Space Representation	381
13.4.	Maximum Likelihood Estimation of Parameters	385
13.5.	The Steady-State Kalman Filter	389
13.6.	Smoothing	394
13.7.	Statistical Inference with the Kalman Filter	397
13.8.	Time-Varying Parameters	399
APPENDIX 13.A. <i>Proofs of Chapter 13 Propositions</i> 403		
	Exercises 406	References 407
<b>14</b>	<i>Generalized Method of Moments</i>	<b>409</b>
14.1.	Estimation by the Generalized Method of Moments	409
14.2.	Examples	415
14.3.	Extensions	424
14.4.	GMM and Maximum Likelihood Estimation	427
APPENDIX 14.A. <i>Proofs of Chapter 14 Propositions</i> 431		
	Exercise 432	References 433
<b>15</b>	<i>Models of Nonstationary Time Series</i>	<b>435</b>
15.1.	Introduction	435
15.2.	Why Linear Time Trends and Unit Roots?	438

---

- 15.3. Comparison of Trend-Stationary and Unit Root Processes 438
- 15.4. The Meaning of Tests for Unit Roots 444
- 15.5. Other Approaches to Trended Time Series 447

APPENDIX 15.A. *Derivation of Selected Equations  
for Chapter 15* 451

References 452

---

**16 Processes with Deterministic Time Trends 454**

- 16.1. Asymptotic Distribution of OLS Estimates of the Simple Time Trend Model 454
- 16.2. Hypothesis Testing for the Simple Time Trend Model 461
- 16.3. Asymptotic Inference for an Autoregressive Process Around a Deterministic Time Trend 463

APPENDIX 16.A. *Derivation of Selected Equations  
for Chapter 16* 472

Exercises 474 References 474

---

**17 Univariate Processes with Unit Roots 475**

- 17.1. Introduction 475
- 17.2. Brownian Motion 477
- 17.3. The Functional Central Limit Theorem 479
- 17.4. Asymptotic Properties of a First-Order Autoregression when the True Coefficient Is Unity 486
- 17.5. Asymptotic Results for Unit Root Processes with General Serial Correlation 504
- 17.6. Phillips-Perron Tests for Unit Roots 506
- 17.7. Asymptotic Properties of a  $p$ th-Order Autoregression and the Augmented Dickey-Fuller Tests for Unit Roots 516
- 17.8. Other Approaches to Testing for Unit Roots 531
- 17.9. Bayesian Analysis and Unit Roots 532

APPENDIX 17.A. *Proofs of Chapter 17 Propositions* 534

Exercises 537 References 541

---

**18 Unit Roots in Multivariate Time Series** 544

- 18.1. Asymptotic Results for Nonstationary Vector Processes 544
- 18.2. Vector Autoregressions Containing Unit Roots 549
- 18.3. Spurious Regressions 557

**APPENDIX 18.A. Proofs of Chapter 18 Propositions** 562

*Exercises* 568      *References* 569

---

---

**19 Cointegration** 571

- 19.1. Introduction 571
- 19.2. Testing the Null Hypothesis of No Cointegration 582
- 19.3. Testing Hypotheses About the Cointegrating Vector 601

**APPENDIX 19.A. Proofs of Chapter 19 Propositions** 618

*Exercises* 625      *References* 627

---

---

**20 Full-Information Maximum Likelihood Analysis of Cointegrated Systems** 630

- 20.1. Canonical Correlation 630
- 20.2. Maximum Likelihood Estimation 635
- 20.3. Hypothesis Testing 645
- 20.4. Overview of Unit Roots—To Difference or Not to Difference? 651

**APPENDIX 20.A. Proofs of Chapter 20 Propositions** 653

*Exercises* 655      *References* 655

---

---

**21 Time Series Models of Heteroskedasticity** 657

- 21.1. Autoregressive Conditional Heteroskedasticity (ARCH) 657
- 21.2. Extensions 665

**APPENDIX 21.A. Derivation of Selected Equations**

*for Chapter 21* 673

*References* 674
