Eduardo D. Sontag · Héctor J. Sussmann  
Vadim I. Utkin

# Nonlinear and Optimal Control Theory

Lectures given at the  
C.I.M.E. Summer School  
held in Cetraro, Italy  
June 19–29, 2004

Editors:  
Paolo Nistri  
Gianna Stefani

## Contents

### Geometry of Optimal Control Problems and Hamiltonian Systems

|                                               |    |
|-----------------------------------------------|----|
| <i>A.A. Agrachev</i> . . . . .                | 1  |
| 1 Lagrange Multipliers' Geometry . . . . .    | 1  |
| 1.1 Smooth Optimal Control Problems . . . . . | 1  |
| 1.2 Lagrange Multipliers . . . . .            | 4  |
| 1.3 Extremals . . . . .                       | 6  |
| 1.4 Hamiltonian System . . . . .              | 7  |
| 1.5 Second Order Information . . . . .        | 10 |
| 1.6 Maslov Index . . . . .                    | 14 |
| 1.7 Regular Extremals . . . . .               | 22 |
| 2 Geometry of Jacobi Curves . . . . .         | 25 |
| 2.1 Jacobi Curves . . . . .                   | 25 |
| 2.2 The Cross-Ratio . . . . .                 | 26 |
| 2.3 Coordinate Setting . . . . .              | 28 |
| 2.4 Curves in the Grassmannian . . . . .      | 29 |
| 2.5 The Curvature . . . . .                   | 30 |
| 2.6 Structural Equations . . . . .            | 33 |
| 2.7 Canonical Connection . . . . .            | 35 |
| 2.8 Coordinate Presentation . . . . .         | 38 |
| 2.9 Affine Foliations . . . . .               | 39 |
| 2.10 Symplectic Setting . . . . .             | 41 |
| 2.11 Monotonicity . . . . .                   | 44 |
| 2.12 Comparison Theorem . . . . .             | 49 |
| 2.13 Reduction . . . . .                      | 51 |
| 2.14 Hyperbolicity . . . . .                  | 53 |
| References . . . . .                          | 58 |

### Lecture Notes on Logically Switched Dynamical Systems

|                                                                  |    |
|------------------------------------------------------------------|----|
| <i>A.S. Morse</i> . . . . .                                      | 61 |
| 1 The Quintessential Switched Dynamical System Problem . . . . . | 62 |
| 1.1 Dwell-Time Switching . . . . .                               | 62 |

|     |                                                  |     |
|-----|--------------------------------------------------|-----|
| 1.2 | Switching Between Stabilizing Controllers .....  | 65  |
| 1.3 | Switching Between Graphs .....                   | 66  |
| 2   | Switching Controls with Memoryless Logics .....  | 67  |
| 2.1 | Introduction .....                               | 67  |
| 2.2 | The Problem .....                                | 67  |
| 2.3 | The Solution .....                               | 67  |
| 2.4 | Analysis .....                                   | 68  |
| 3   | Collaborations .....                             | 68  |
| 4   | The Curse of the Continuum .....                 | 69  |
| 4.1 | Process Model Class .....                        | 69  |
| 4.2 | Controller Covering Problem .....                | 73  |
| 4.3 | A Natural Approach .....                         | 74  |
| 4.4 | A Different Approach .....                       | 75  |
| 4.5 | Which Metric? .....                              | 75  |
| 4.6 | Construction of a Control Cover .....            | 76  |
| 5   | Supervisory Control .....                        | 76  |
| 5.1 | The System .....                                 | 77  |
| 5.2 | Slow Switching .....                             | 86  |
| 5.3 | Analysis .....                                   | 87  |
| 5.4 | Analysis of the Dwell Time Switching Logic ..... | 102 |
| 6   | Flocking .....                                   | 110 |
| 6.1 | Leaderless Coordination .....                    | 111 |
| 6.2 | Symmetric Neighbor Relations .....               | 142 |
| 6.3 | Measurement Delays .....                         | 148 |
| 6.4 | Asynchronous Flocking .....                      | 155 |
| 6.5 | Leader Following .....                           | 158 |
|     | References .....                                 | 159 |

## Input to State Stability: Basic Concepts and Results

|                                                                            |     |
|----------------------------------------------------------------------------|-----|
| <i>E.D. Sontag</i> .....                                                   | 163 |
| 1 Introduction .....                                                       | 163 |
| 2 ISS as a Notion of Stability of Nonlinear I/O Systems .....              | 163 |
| 2.1 Desirable Properties .....                                             | 164 |
| 2.2 Merging Two Different Views of Stability .....                         | 165 |
| 2.3 Technical Assumptions .....                                            | 166 |
| 2.4 Comparison Function Formalism .....                                    | 166 |
| 2.5 Global Asymptotic Stability .....                                      | 167 |
| 2.6 0-GAS Does Not Guarantee Good Behavior<br>with Respect to Inputs ..... | 168 |
| 2.7 Gains for Linear Systems .....                                         | 168 |
| 2.8 Nonlinear Coordinate Changes .....                                     | 169 |
| 2.9 Input-to-State Stability .....                                         | 171 |
| 2.10 Linear Case, for Comparison .....                                     | 172 |
| 2.11 Feedback Redesign .....                                               | 173 |
| 2.12 A Feedback Redesign Theorem for Actuator Disturbances .....           | 174 |

|      |                                                                                                                |     |
|------|----------------------------------------------------------------------------------------------------------------|-----|
| 3    | Equivalences for ISS .....                                                                                     | 176 |
| 3.1  | Nonlinear Superposition Principle .....                                                                        | 176 |
| 3.2  | Robust Stability .....                                                                                         | 177 |
| 3.3  | Dissipation .....                                                                                              | 178 |
| 3.4  | Using “Energy” Estimates Instead of Amplitudes .....                                                           | 180 |
| 4    | Cascade Interconnections .....                                                                                 | 180 |
| 4.1  | An Example of Stabilization Using the ISS Cascade Approach ..                                                  | 182 |
| 5    | Integral Input-to-State Stability .....                                                                        | 183 |
| 5.1  | Other Mixed Notions .....                                                                                      | 183 |
| 5.2  | Dissipation Characterization of iISS .....                                                                     | 184 |
| 5.3  | Superposition Principles for iISS .....                                                                        | 185 |
| 5.4  | Cascades Involving iISS Systems .....                                                                          | 186 |
| 5.5  | An iISS Example .....                                                                                          | 188 |
| 6    | Input to State Stability with Respect to Input Derivatives .....                                               | 190 |
| 6.1  | Cascades Involving the $D^k$ ISS Property .....                                                                | 190 |
| 6.2  | Dissipation Characterization of $D^k$ ISS .....                                                                | 191 |
| 6.3  | Superposition Principle for $D^k$ ISS .....                                                                    | 191 |
| 6.4  | A Counter-Example Showing that $D^1$ ISS $\neq$ ISS .....                                                      | 192 |
| 7    | Input-to-Output Stability .....                                                                                | 192 |
| 8    | Detectability and Observability Notions .....                                                                  | 194 |
| 8.1  | Detectability .....                                                                                            | 195 |
| 8.2  | Dualizing ISS to OSS and IOSS .....                                                                            | 196 |
| 8.3  | Lyapunov-Like Characterization of IOSS .....                                                                   | 196 |
| 8.4  | Superposition Principles for IOSS .....                                                                        | 197 |
| 8.5  | Norm-Estimators .....                                                                                          | 197 |
| 8.6  | A Remark on Observers and Incremental IOSS .....                                                               | 198 |
| 8.7  | Variations of IOSS .....                                                                                       | 199 |
| 8.8  | Norm-Observability .....                                                                                       | 200 |
| 9    | The Fundamental Relationship Among ISS, IOS, and IOSS .....                                                    | 201 |
| 10   | Systems with Separate Error and Measurement Outputs .....                                                      | 202 |
| 10.1 | Input-Measurement-to-Error Stability .....                                                                     | 202 |
| 10.2 | Review: Viscosity Subdifferentials .....                                                                       | 203 |
| 10.3 | RES-Lyapunov Functions .....                                                                                   | 204 |
| 11   | Output to Input Stability and Minimum-Phase .....                                                              | 205 |
| 12   | Response to Constant and Periodic Inputs .....                                                                 | 205 |
| 13   | A Remark Concerning ISS and $H_\infty$ Gains .....                                                             | 206 |
| 14   | Two Sample Applications .....                                                                                  | 207 |
| 15   | Additional Discussion and References .....                                                                     | 209 |
|      | References .....                                                                                               | 213 |
|      | <b>Generalized Differentials, Variational Generators,<br/>and the Maximum Principle with State Constraints</b> |     |
|      | <i>H.J. Sussmann</i> .....                                                                                     | 221 |
| 1    | Introduction .....                                                                                             | 221 |
