Penalising Brownian Paths

 Springer

Contents

0	Introduction	1
0.1	The Penalisation Problem	1
0.2	Asymptotic Study of the Normalisation Factor	3
0.3	From the Family $(\nu_x, x \in \mathbb{R})$ to a Penalisation Theorem	8
0.4	Penalisation and Conditioning by an Event of Probability 0	13
0.5	Penalisation and Statistical Mechanics	23
0.6	Penalisation as a Machine to Construct Martingales	27
	Bibliography	33
1	Some Penalisations of the Wiener Measure	35
1.1	Introduction : A Rough Idea about Penalisation	35
1.2	Some Meta-Theorems Leading to Penalised Probabilities	36
1.3	Case I : $\Gamma_t = S_t := \sup_{s \leq t} X_s$, or $\Gamma_t = L_t^0(X)$	40
1.4	Case II : $\Gamma_t = \int_0^t ds q(X_s)$, with $(X_s) : \text{BM}(\mathbb{R}^d)$, $d = 1, 2$	45
1.5	Case III : $\Gamma_t = L_t^0(R_t^{(\delta)})$, with $R^{(\delta)} := \text{BES}(\delta)$, $0 < \delta < 2$	48
1.6	Case IV : $\Gamma_t = \Sigma_t^{(f), (g)}$ where $\Sigma_t := \sup_{u \leq g_t} (u - g_u)$, or $\Sigma_t' := \sup_{u \leq t} (u - g_u)$, or $\Sigma_t'' := \sup_{u \leq d_t} (u - g_u)$	52
1.7	Case V : $\Gamma_t = \sup_{s \leq t} \theta_s$ ($d = 2$) or $\Gamma_t = 1_{T_c > t} \exp\left(\frac{\lambda}{\gamma} H_t\right)$ where $H_t = \int_0^t \frac{ds}{R_s^2}$	56
1.8	Concluding Remarks	62
	Bibliography	63
2	Feynman-Kac Penalisations for Brownian Motion	67
2.1	Introduction	67
2.2	On the Solutions of Sturm-Liouville Equations and Associated Brownian Martingales	72

2.3	A Direct Proof of Point 1) of Theorem 2.1	75
2.4	Absolute Continuity Relationships between the Probabilities $W_x^{(q)}$ ($q \in \mathcal{I}$) and Definition of the σ -finite Measures W_x ($x \in \mathbb{R}$)	81
2.5	An Extension of Theorem 2.1	103
2.6	Penalisation by a Function of $L_t^{a_1}$ and $L_t^{a_2}$, with $a_1 \neq a_2$	113
	Bibliography	130
3	Penalisations of a Bessel Process with Dimension d ($0 < d < 2$) by a Function of the Ranked Lengths of its Excursions	131
	Generalities	131
3.1	Introduction	131
3.2	Some Prerequisites about Bessel Processes of Dimension $d = 2(1 - \alpha)$, $0 < \alpha < 1$	135
	Penalisations of a BES(d) Process, Involving One Ranked Length of its Excursions	148
3.3	Penalisation by $(V_{g_t}^{(1)} \leq x)$	148
3.4	Penalisation by $(V_t^{(1)} \leq x)$ and $(V_{d_t}^{(1)} \leq x)$	162
3.5	Penalisation with $(V_{g_t}^{(n)} \leq x)$ ($x > 0$), for $n \geq 1$	165
3.6	Weak Convergence of the Penalised Laws $Q^{(n,x)}$, as $n \rightarrow \infty$; a Commutative Diagram	181
3.7	Penalisations by $(V_t^{(n)} \leq x)$ and $(V_{d_t}^{(n)} \leq x)$, for $n \geq 2$	183
	Penalisations of a BES(d) Process, Involving Several Ranked Lengths of its Excursions	185
3.8	Asymptotics for the Distribution of Several Ranked Lengths of Excursions of a BES(d) Process	185
3.9	Penalisation by $(V_{g_t}^{(1)} \leq x_1, \dots, V_{g_t}^{(n)} \leq x_n)$	205
	Bibliography	222
4	A General Principle and Some Questions about Penalisations	225
4.1	Introduction	225
4.2	Asymptotic Studies of $(M_t^h, t \geq 0)$, $\left(\frac{h(\Gamma_t)}{E_\infty[h(\Gamma_t)]}, t \geq 0\right)$ and of $\left(M_t^h - \frac{h(\Gamma_t)}{E_\infty[h(\Gamma_t)]} , t \geq 0\right)$	232
4.3	Asymptotic study of $E_\infty \left[1_{\Lambda} \frac{h(\Gamma_t)}{E_\infty[h(\Gamma_t)]}\right]$ for $\Lambda \in \mathcal{F}_\infty$	247
4.4	Convergence in Law, as $t \rightarrow \infty$ of the Family of Processes $(X_u^{(t)}; 0 \leq u \leq 1) := \left(\frac{X_u}{\sqrt{t}}; 0 \leq u \leq 1\right)$	250
4.5	Some Final Remarks	259
	Bibliography	260
