

Nicolas Ginoux

The Dirac Spectrum

 Springer

Contents

1	Basics of spin geometry	8
1.1	Spin group and spin structure	8
1.2	Spinor bundle and Clifford multiplication	8
1.3	The Dirac operator	8
1.4	Spinors on hypersurfaces and coverings	16
1.5	Elliptic boundary conditions for the Dirac operator	22
2	Explicit computations of spectra	26
2.1	Spectrum of some non-negatively curved spaceforms	26
2.2	Spectrum of some other homogeneous spaces	35
2.3	Small eigenvalues of some symmetric spaces	39
3	Lower eigenvalue estimates on closed manifolds	41
3.1	Friedrich's inequality	41
3.2	Improving Friedrich's inequality in presence of a parallel form	45
3.3	Improving Friedrich's inequality in a conformal way	57
3.4	Improving Friedrich's inequality with the energy-momentum tensor	55
3.5	Improving Friedrich's inequality with other curvature components	70
3.6	Improving Friedrich's inequality on surfaces of positive genus	71
3.7	Improving Friedrich's inequality on bounding manifolds	64
4	Lower eigenvalue estimates on compact manifolds with boundary	69
4.1	Case of the gAPS boundary condition	69
4.2	Case of the CHI boundary condition	70
4.3	Case of the MIT bag boundary condition	74
4.4	Case of the mgAPS boundary condition	74

5	Upper eigenvalue bounds on closed manifolds	75
5.1	Intrinsic upper bounds	76
5.2	Extrinsic upper bounds	89
6	Prescription of eigenvalues on closed manifolds	93
6.1	Dirac isospectrality	93
6.2	Harmonic spinors	95
6.3	Prescribing the lower part of the spectrum	100
7	The Dirac spectrum on non-compact manifolds	103
7.1	Essential and point spectrum	103
7.2	Explicit computations of spectra	104
7.3	Lower bounds on the spectrum	106
7.4	Absence of a spectral component	109
8	Other topics related with the Dirac spectrum	113
8.1	Other eigenvalue estimates	113
8.2	Spectral gap	116
8.3	Pinching Dirac eigenvalues	117
8.4	Spectrum of other Dirac-type operators	119
8.5	Conformal spectral invariants	122
8.6	Convergence of eigenvalues	125
8.7	Eta-invariants	126
8.8	Positive mass theorems	127
A	The twistor and Killing spinor equations	131
A.1	Definitions and examples	131
A.2	Elementary properties of twistor-spinors	137
A.3	Classification results for manifolds with twistor-spinors	140
A.4	Classification results for manifolds with Killing spinors	141
	Bibliography	147
	Index	153
