# Smooth Ergodic Theory for Endomorphisms

Springer

# Contents

|            |                                                              |    |
|------------|--------------------------------------------------------------|----|
| <b>I</b>   | <b>Preliminaries</b> .....                                   | 1  |
| I.1        | Metric Entropy.....                                          | 1  |
| I.2        | Multiplicative Ergodic Theorem.....                          | 2  |
| I.3        | Inverse Limit Space.....                                     | 4  |
| <b>II</b>  | <b>Margulis-Ruelle Inequality</b> .....                      | 9  |
| II.1       | Statement of the Theorem.....                                | 9  |
| II.2       | Preliminaries.....                                           | 9  |
| II.3       | Proof of the Theorem.....                                    | 10 |
| <b>III</b> | <b>Expanding Maps</b> .....                                  | 15 |
| III.1      | Main Results.....                                            | 15 |
| III.2      | Proof of Theorem III.1.1.....                                | 17 |
| III.3      | Basic Facts About Expanding Maps.....                        | 19 |
| III.4      | Proofs of Theorems III.1.2 and III.1.3.....                  | 22 |
| <b>IV</b>  | <b>Axiom A Endomorphisms</b> .....                           | 27 |
| IV.1       | Introduction and Main Results.....                           | 27 |
| IV.2       | Preliminaries.....                                           | 29 |
| IV.3       | Volume Lemma and the Hölder Continuity of $\phi^q$ .....     | 31 |
| IV.4       | Equilibrium States of $\phi^q$ on $A^f$ .....                | 38 |
| IV.5       | Pesin's Entropy Formula.....                                 | 40 |
| IV.6       | Large Ergodic Theorem and Proof of Main Theorems.....        | 42 |
| <b>V</b>   | <b>Unstable and Stable Manifolds for Endomorphisms</b> ..... | 45 |
| V.1        | Preliminary Facts.....                                       | 46 |
| V.2        | Fundamental Lemmas.....                                      | 49 |
| V.3        | Some Technical Facts About Contracting Maps.....             | 56 |
| V.4        | Local Unstable Manifolds.....                                | 58 |
| V.5        | Global Unstable Sets.....                                    | 73 |
| V.6        | Local and Global Stable Manifolds.....                       | 78 |

|             |                                                                                      |            |
|-------------|--------------------------------------------------------------------------------------|------------|
| V.7         | Hölder Continuity of Sub-bundles.....                                                | 81         |
| V.8         | Absolute Continuity of Families of Submanifolds.....                                 | 83         |
| V.9         | Absolute Continuity of Conditional Measures.....                                     | 85         |
| <b>VI</b>   | <b>Pesin's Entropy Formula for Endomorphisms .....</b>                               | <b>87</b>  |
| VI.1        | Main Results.....                                                                    | 87         |
| VI.2        | Preliminaries.....                                                                   | 88         |
| VI.3        | Proof of Theorem VI.1.1.....                                                         | 91         |
| <b>VII</b>  | <b>SRB Measures and Pesin's Entropy Formula for Endomorphisms....</b>                | <b>97</b>  |
| VII.1       | Formulation of the SRB Property and Main Results.....                                | 98         |
| VII.2       | Technical Preparations for the Proof of the Main Result.....                         | 100        |
| VII.3       | Proof of the Sufficiency for the Entropy Formula.....                                | 110        |
| VII.4       | Lyapunov Charts.....                                                                 | 112        |
| VII.5       | Local Unstable Manifolds and Center Unstable Sets.....                               | 116        |
|             | VII.5.1 Local Unstable Manifolds and Center<br>Unstable Sets.....                    | 116        |
|             | VII.5.2 Some Estimates.....                                                          | 120        |
|             | VII.5.3 Lipschitz Property of Unstable Subspaces<br>within Center Unstable Sets..... | 121        |
| VII.6       | Related Measurable Partitions.....                                                   | 125        |
|             | VII.6.1 Partitions Adapted to Lyapunov Charts.....                                   | 125        |
|             | VII.6.2 More on Increasing Partitions.....                                           | 128        |
|             | VII.6.3 Two Useful Partitions.....                                                   | 130        |
|             | VII.6.4 Quotient Structure.....                                                      | 131        |
|             | VII.6.5 Transverse Metrics.....                                                      | 132        |
| VII.7       | Some Consequences of Besicovitch's Covering Theorem.....                             | 135        |
| VII.8       | The Main Proposition.....                                                            | 139        |
| VII.9       | Proof of the Necessity for the Entropy Formula.....                                  | 144        |
|             | VII.9.1 The Ergodic Case.....                                                        | 144        |
|             | VII.9.2 The General Case.....                                                        | 148        |
| <b>VIII</b> | <b>Ergodic Property of Lyapunov Exponents.....</b>                                   | <b>151</b> |
| VIII.1      | Introduction and Main Results.....                                                   | 151        |
| VIII.2      | Lyapunov Exponents of Axiom A Attractors of Endomorphisms.....                       | 153        |
| VIII.3      | Nonuniformly Completely Hyperbolic Attractors.....                                   | 163        |
| <b>IX</b>   | <b>Generalized Entropy Formula .....</b>                                             | <b>173</b> |
| IX.1        | Related Notions and Statements of the Main Results.....                              | 173        |
|             | IX.1.1 Pointwise Dimensions and Transverse Dimensions.....                           | 174        |
|             | IX.1.2 Statements of the Main Results.....                                           | 176        |
| IX.2        | Preliminaries.....                                                                   | 176        |
|             | IX.2.1 Some Estimations on Unstable Manifolds.....                                   | 177        |
|             | IX.2.2 Related Partitions.....                                                       | 180        |
|             | IX.2.3 Transverse Metrics on $\eta_i(x)/\eta_{i-1}$ with $2 \leq i \leq n$ .....     | 182        |
|             | IX.2.4 Entropies of the Related Partitions.....                                      | 186        |

|                         |                                                                                     |     |
|-------------------------|-------------------------------------------------------------------------------------|-----|
| IX.3                    | Definitions of Local Entropies along Unstable Manifolds.....                        | 188 |
| IX.4                    | Estimates of Local Entropies along Unstable Manifolds.....                          | 193 |
| IX.4.1                  | Estimate of Local Entropy $h_1$ .....                                               | 193 |
| IX.4.2                  | Estimate of Local Entropy $h_i$ from Below<br>with $2 \leq i \leq u$ .....          | 194 |
| IX.4.3                  | Estimate of Local Entropy $h_i$ from Above<br>with $2 \leq i \leq u$ .....          | 197 |
| IX.5                    | The General Case: without Ergodic Assumption.....                                   | 203 |
| <b>X</b>                | <b>Exact Dimensionality of Hyperbolic Measures</b> .....                            | 205 |
| X.1                     | Expanding Maps' Case—Proof of Theorem X.0.1.....                                    | 206 |
| X.2                     | Diffeomorphisms' Case—Proof of Theorem X.0.2.....                                   | 211 |
| X.2.1                   | Reconstruction of a Special Partition.....                                          | 214 |
| X.2.2                   | Preparatory Lemmas.....                                                             | 224 |
| X.2.3                   | Proof of Theorem X.2.2.....                                                         | 231 |
| X.2.4                   | The Case of Nonergodic Measures.....                                                | 233 |
| X.2.5                   | Proofs of Requirements (X.60) and (X.61).....                                       | 235 |
| X.3                     | Comments on Further Researches.....                                                 | 244 |
