LEONHARDI EULERI

COMMENTATIONES MECHANICAE

AD THEORIAM CORPORUM FLUIDORUM PERTINENTES

VOLUMEN POSTERIUS

EDIDIT

CLIFFORD AMBROSE TRUESDELL III

AUCTORITATE ET IMPENSIS
SOCIETATIS SCIENTIARUM NATURALIUM HELVETICAE

LAUSANNAE MCMLV

VENDITIONI EXPONUNT
ORELL FÜSSLI TURICI

EDITOR'S INTRODUCTION

Part I. The first three sections of EULER's treatise on fluid mechanics (1766) X

Part II. The theory of aerial sound, 1687—1788. XIX

A. The experimental background of researches on sound propagation in the eighteenth century XIX

B. NEWTON's theory of sound propagation (1687, 1713) XXI

C. EULER's *Physical dissertation on sound* (1727) XXIV

D. Propagational acoustics in EULER's *Attempt at a new theory of music, clearly explained from the most certain principles of harmony* (c. 1731) XXIX

E. JOHN II BERNOULLI's *Physical and geometrical researches on the question: how does the propagation of light take place?* (1736) XXX

F. The theory of wave propagation in EULER's work on physical optics, 1744—1749 XXXII

G. DANIEL BERNOULLI's work on the propagation of sound before 1762 XXXIV

H. LAGRANGE's *Researches on the nature and the propagation of sound* (1759) XXXV

J. The slow emergence of the one-dimensional wave equation for aerial propagation (1687—1759). XXXVI

K. EULER's two letters to LAGRANGE in October, 1759 XXXVII

L. EULER's first memoir, *On the propagation of sound* (1759) XLI

M. EULER's second memoir, *Supplement to the researches on the propagation of sound* (1759) XLV

N. EULER's third memoir, *Sequel to the researches on the propagation of sound* (1759) XLVII

O. The correspondence between LAGRANGE and EULER from November, 1759, to June, 1760 IL

P. LAGRANGE's *New researches on the nature and the propagation of sound* (1759—1761) LI

Q. DANIEL BERNOULLI's *Physical, mechanical, and analytical researches on sound and on the tones of differently constructed organ pipes* (1762) LV

R. EULER's *More detailed enlightenment on the generation and propagation of sound and on the formation of echos* (1765) LIX

S. The fourth section of EULER's treatise on fluid mechanics (1766) . . LXIII

T. The theory of aerial sound from 1767 to 1788 LXX

Part III. Rational fluid mechanics, 1765—1788 LXXIII

A. BORDA's *Memoir on the flow of fluids through the orifices of vessels* (1766) LXXIII

B. The remaining work of EULER (1773—1781) LXXVI

C. Remarks on LAPLACE and LEGENDRE's early studies in fluid mechanics (1773—1788) and on the expositions of COUSIN (1777—1796) . LXXXII

D. Fluid mechanics in the correspondence between LAGRANGE and D'ALEMBERT, 1762—1781 LXXXV

E. LAGRANGE's *Memoir on the theory of the motion of fluids* (1781) . . XC

F. The remaining work of LAGRANGE (1784—1788) C

Appendix. BRANDES' translation of EULER's treatise on fluid mechanics (1805) CIII

Analytical table of contents for EULER's treatise on fluid mechanics CVI
