Inverse Problems

Proceedings of the Conference held at the Mathematical Research Institute at Oberwolfach, Black Forest, May 18–24, 1986

Edited by

John Rozier Cannon
Ulrich Hornung

1986

Birkhäuser Verlag
Basel · Boston · Stuttgart

Editors

Prof. Dr. John Rozier Cannon
Dept. Pure & Appl. Mathematics
Washington State University
Pullman, Washington 99163
USA

Prof. Dr. Ulrich Hornung
Sonderforschungsbereich 72
Wegelerstrasse 6

C O N T E N T S

List of contributors 9

R. S. Anderssen:
The linear functional strategy for improperly posed problems 11

John R. Cannon and Yanping Lin:
Determination of a source term in a linear parabolic differential equation with mixed boundary conditions 31

P. C. DuChateau:
Inverse problems for parabolic partial differential equations 51

Margaret Cheney, James H. Rose and Brian DeFacio:
Three-dimensional inverse scattering 61

Kenneth R. Driessel:
On isospectral gradient flows - solving matrix eigenproblems using differential equations 69

Andreas Kirsch and Rainer Kreß:
On an integral equation of the first kind in inverse acoustic scattering 93

Rudolf Gorenflo:
Approximation of discrete probability distributions in spherical stereology 103

Tao Lin and Richard Ewing:
Parameter estimation for distributed systems arising in fluid flow problems via time series methods 117

Carlo Domenico Pagani:
Analytic solutions to the inverse problem of the Newtonian potential 127

John R. Cannon and Salvador Pérez-Esteva:
A note on an inverse problem related to the 3-D heat equation 133

Michael Pilant and William Rundell:
Undetermined coefficient problems for nonlinear elliptic and parabolic equations 139

Thomas I. Seidmann:
The method of 'generalized interpolation' for approximate solution of ill-posed problems 155

Takashi Suzuki:
Gel'fand-Levitan's theory and related inverse problems 163

P. C. Sabatier:
Reconstruction ambiguities of inverse scattering on the line . 173
