## CONTENTS

Foreword .....	v
Preface .....	vii
Wave propagation inverse problems in medicine and environmental health .....	1
<i>Richard A. Albanese</i>	
Variational structure of inverse problems in wave propagation and vibration .....	13
<i>James G. Berryman</i>	
Convergence of numerical methods for inverse problems with general input sources .....	45
<i>Robert W. Brookes and Kenneth P. Bube</i>	
Topics in ocean acoustic inverse problems .....	85
<i>Michael D. Collins</i>	
Survey of selected topics in inverse electromagnetic scattering theory .....	105
<i>David Colton</i>	
Generalized modes in an acoustic strip .....	129
<i>Elisabeth Croc and Yves Dermenjian</i>	
Inverse scattering problems for Schrödinger operators with magnetic and electric potentials .....	147
<i>G. Eskin and J. Ralston</i>	
Results, old and new, in computed tomography .....	167
<i>Adel Faridani</i>	
Detecting subsurface hydrocarbons with elastic wavefields .....	195
<i>D.J. Foster, R.G. Keys, and D.P. Schmitt</i>	
How many parameters can one solve for in diffuse tomography? .....	219
<i>F.A. Grünbaum and S.K. Patch</i>	

Modeling scanned Acoustic imaging of defects at solid interfaces .....	237
<i>John G. Harris</i>	
On reconstruction of the diffusion and of the principal coefficient of a hyperbolic equation .....	259
<i>Victor Isakov</i>	
The $r$ -solution and its applications in linearized waveform inversion for a layered background .....	277
<i>V.G. Khajdukov, V.I. Kostin, and V.A. Tcheverda</i>	
Directional moments in the acoustic inverse problem.....	295
<i>Yaroslav Kurylev and Alexander Starkov</i>	
Finding the density of a membrane from nodal lines .....	325
<i>Ching-Ju Ashraf Lee and Joyce R. McLaughlin</i>	
An inverse obstacle problem: A uniqueness theorem for balls .....	347
<i>Changmei Liu</i>	
Inverse scattering in acoustic media using interior transmission eigenvalues .....	357
<i>J.R. McLaughlin, P.E. Sacks, and M. Somasundaram</i>	
A layer stripping algorithm in elastic impedance tomography .....	375
<i>Gen Nakamura and Gunther Uhlmann</i>	
Partitioned nonlinear optimization for the interpretation of seismograms .....	385
<i>Guust Nolet</i>	
Applications of inverse methods to the analysis of refraction and wide-angle seismic data .....	395
<i>Robert L. Nowack</i>	
Inversions in astronomy and the SOLA method.....	419
<i>Frank P. Pijpers</i>	
Local reconstruction applied to x-ray microtomography.....	443
<i>Erik L. Ritman, John H. Dunsmuir, Adel Faridani, David V. Finch, Kennan T. Smith, and Paul J. Thomas</i>	

On the layer stripping approach to a 1-D inverse problem.....	453
<i>John Sylvester</i>	

Estimates for approximate solutions to acoustic inverse scattering problems .....	463
<i>Michael E. Taylor</i>
