Contents

Preface *page* xi

1 Combinatorics of finite sets 1
1.1 Fisher's Inequality 1
1.2 The First Ray-Chaudhuri–Wilson Inequality 3
1.3 Symmetric designs and Ryser designs 5
1.4 Equidistant families of sets 8
Exercises 11
Notes 12

2 Introduction to designs 14
2.1 Incidence structures 14
2.2 Graphs 19
2.3 Basic properties of (v, b, r, k, λ)-designs 24
2.4 Symmetric designs 28
2.5 The Bruck–Ryser–Chowla Theorem 34
2.6 Automorphisms of symmetric designs 38
2.7 A symmetric (41, 16, 6)-design 42
2.8 A symmetric (79, 13, 2)-design 48
Exercises 53
Notes 56

3 Vector spaces over finite fields 59
3.1 Finite fields 59
3.2 Affine planes and nets 61
3.3 The 36 officers problem 66
3.4 Projective planes 72
3.5 Affine geometries over finite fields 76

3.6 Projective geometries over finite fields 79
3.7 Combinatorial characterization of $PG_{n-1}(n, q)$ 86
3.8 Two infinite families of symmetric designs 95
3.9 Linear codes 97
Exercises 103
Notes 110

4 Hadamard matrices 113
4.1 Basic properties of Hadamard matrices 113
4.2 Kronecker product constructions 116
4.3 Conference matrices 118
4.4 Regular Hadamard matrices 126
4.5 From Paley matrices to regular Hadamard matrices 132
4.6 Regular sets of (± 1)-matrices 133
4.7 Binary equidistant codes 144
Exercises 150
Notes 152

5 Resolvable designs 154
5.1 Bose's Inequality 154
5.2 Affine α-resolvable designs 161
5.3 Resolvable 2-designs 163
5.4 Embedding of resolvable designs in symmetric designs 172
5.5 Resolvable 2-designs and equidistant codes 182
Exercises 184
Notes 184

6 Symmetric designs and t-designs 186
6.1 Basic properties of t-designs 186
6.2 The Second Ray-Chaudhuri–Wilson Inequality 191
6.3 Hadamard 3-designs 193
6.4 Cameron's Theorem 195
6.5 Golay codes and Witt designs 198
6.6 Symmetric designs with parameters (56, 11, 2) and (176, 50, 14) 203
Exercises 207
Notes 210

7 Symmetric designs and regular graphs 212
7.1 Strongly regular graphs 212
7.2 Eigenvalues of strongly regular graphs 219

Downloaded from Cambridge Books Online by IP 193.206.101.2 on Fri Apr 10 12:55:54 BST 2015.

Cambridge Books Online © Cambridge University Press, 2015

7.3 Switching in strongly regular graphs 223
7.4 Symmetric designs with polarities 233
7.5 Symmetric designs and digraphs 239
Exercises 243
Notes 245

8 Block intersection structure of designs 247
8.1 Association schemes 247
8.2 Quasi-symmetric designs 250
8.3 Multiples of symmetric designs 259
8.4 Quasi-3 symmetric designs 263
8.5 Block schematic designs with three intersection numbers 270
8.6 Designs with a nearly affine decomposition 276
8.7 A symmetric (71, 15, 3)-design 280
Exercises 286
Notes 286

9 Difference sets 289
9.1 Group invariant matrices and group rings 289
9.2 Singer and Paley–Hadamard difference sets 299
9.3 Symmetries in a group ring 301
9.4 Building blocks and building sets 307
9.5 McFarland, Spence, and Davis–Jedwab difference sets 310
9.6 Relative difference sets 313
Exercises 319
Notes 321

10 Balanced generalized weighing matrices 323
10.1 Basic properties of BGW-matrices 323
10.2 BGW-matrices with classical parameters 331
10.3 BGW-matrices and relative difference sets 336
10.4 Kronecker product constructions 341
10.5 BGW-matrices and projective geometries 354
Exercises 365
Notes 366

11 Decomposable symmetric designs 368
11.1 A symmetric (66, 26, 10)-design 368
11.2 Global decomposition of symmetric designs 369
11.3 Six infinite families of globally decomposable symmetric designs 374

Downloaded from Cambridge Books Online by IP 193.206.101.2 on Fri Apr 10 12:55:54 BST 2015.

11.4 Productive Hadamard matrices 376
11.5 Symmetric designs with irregular global decomposition 383
11.6 Decomposable symmetric designs and regular graphs 386
11.7 Local decomposition of symmetric designs 391
11.8 Infinite families of locally decomposable symmetric designs 397
11.9 An infinite family of designs with a nearly affine decomposition 402
Exercises 406
Notes 406

12 Subdesigns of symmetric designs 407
12.1 Tight subdesigns 407
12.2 Examples of tight subdesigns 412
12.3 Normal subdesigns 421
12.4 Symmetric designs with M-arcs 424
Exercises 427
Notes 427

13 Non-embeddable quasi-residual designs 429
13.1 Quasi-residuals of non-existing symmetric designs 429
13.2 Linear non-embeddability conditions 431
13.3 BGW-matrices and non-embeddability 436
13.4 Non-embeddable quasi-derived designs 443
Exercises 445
Notes 446

14 Ryser designs 447
14.1 Basic properties of Ryser designs 447
14.2 Type-1 Ryser designs 456
14.3 Ryser designs of prime index 464
14.4 Ryser designs of small index 467
14.5 Ryser designs of small gcd 475
Exercises 486
Notes 486

Appendix 488
