Nikolai Ivanov
Steven G. Krantz
David Saltman (Chair)

2000 *Mathematics Subject Classification*. Primary 11F12, 11F30, 11F72.

Library of Congress Cataloging-in-Publication Data

Iwaniec, Henryk.

Spectral methods of automorphic forms / Henryk Iwaniec.—2nd ed.

p. cm. — (Graduate studies in mathematics, ISSN 1065-7339 ; v. 53)

First ed. published in *Revista matemática iberoamericana* in 1995.

Includes bibliographical references and index.

ISBN 0-8218-3160-7 (acid-free paper)

1. Automorphic functions. 2. Automorphic forms. 3. Spectral theory (Mathematics)

I. Title. II. Series.

QA353.A9 I88 2002

Contents

Preface	ix
Preface to the AMS Edition	xi
Introduction	1
Chapter 0. Harmonic Analysis on the Euclidean Plane	3
Chapter 1. Harmonic Analysis on the Hyperbolic Plane	7
1.1. The upper half-plane	7
1.2. \mathbb{H} as a homogeneous space	12
1.3. The geodesic polar coordinates	15
1.4. Group decompositions	16
1.5. The classification of motions	17
1.6. The Laplace operator	19
1.7. Eigenfunctions of Δ	19
1.8. The invariant integral operators	26
1.9. The Green function on \mathbb{H}	32
Chapter 2. Fuchsian Groups	37
2.1. Definitions	37
2.2. Fundamental domains	38
2.3. Basic examples	41
2.4. The double coset decomposition	45

2.5. Kloosterman sums	47
2.6. Basic estimates	49
Chapter 3. Automorphic Forms	53
3.1. Introduction	53
3.2. The Eisenstein series	56
3.3. Cusp forms	57
3.4. Fourier expansion of the Eisenstein series	59
Chapter 4. The Spectral Theorem. Discrete Part	63
4.1. The automorphic Laplacian	63
4.2. Invariant integral operators on $\mathcal{C}(\Gamma \backslash \mathbb{H})$	64
4.3. Spectral resolution of Δ in $\mathcal{C}(\Gamma \backslash \mathbb{H})$	68
Chapter 5. The Automorphic Green Function	71
5.1. Introduction	71
5.2. The Fourier expansion	72
5.3. An estimate for the automorphic Green function	75
5.4. Evaluation of some integrals	76
Chapter 6. Analytic Continuation of the Eisenstein Series	81
6.1. The Fredholm equation for the Eisenstein series	81
6.2. The analytic continuation of $E_{\alpha}(z, s)$	84
6.3. The functional equations	86
6.4. Poles and residues of the Eisenstein series	88
Chapter 7. The Spectral Theorem. Continuous Part	95
7.1. The Eisenstein transform	96
7.2. Bessel's inequality	98
7.3. Spectral decomposition of $\mathcal{E}(\Gamma \backslash \mathbb{H})$	101
7.4. Spectral expansion of automorphic kernels	104
Chapter 8. Estimates for the Fourier Coefficients of Maass Forms	107
8.1. Introduction	107
8.2. The Rankin–Selberg L -function	109
8.3. Bounds for linear forms	110
8.4. Spectral mean-value estimates	113

8.5. The case of congruence groups	116
Chapter 9. Spectral Theory of Kloosterman Sums	121
9.1. Introduction	121
9.2. Analytic continuation of $Z_s(m, n)$	122
9.3. Bruggeman–Kuznetsov formula	125
9.4. Kloosterman sums formula	128
9.5. Petersson’s formulas	131
Chapter 10. The Trace Formula	135
10.1. Introduction	135
10.2. Computing the spectral trace	139
10.3. Computing the trace for parabolic classes	142
10.4. Computing the trace for the identity motion	145
10.5. Computing the trace for hyperbolic classes	146
10.6. Computing the trace for elliptic classes	147
10.7. Trace formulas	150
10.8. The Selberg zeta-function	152
10.9. Asymptotic law for the length of closed geodesics	154
Chapter 11. The Distribution of Eigenvalues	157
11.1. Weyl’s law	157
11.2. The residual spectrum and the scattering matrix	162
11.3. Small eigenvalues	164
11.4. Density theorems	168
Chapter 12. Hyperbolic Lattice-Point Problems	171
Chapter 13. Spectral Bounds for Cusp Forms	177
13.1. Introduction	177
13.2. Standard bounds	178
13.3. Applying the Hecke operator	180
13.4. Constructing an amplifier	181
13.5. The ergodicity conjecture	183
Appendix A. Classical Analysis	185
A.1. Self-adjoint operators	185

A.2. Matrix analysis	187
A.3. The Hilbert–Schmidt integral operators	189
A.4. The Fredholm integral equations	190
A.5. Green function of a differential equation	194
Appendix B. Special Functions	197
B.1. The gamma function	197
B.2. The hypergeometric functions	199
B.3. The Legendre functions	200
B.4. The Bessel functions	202
B.5. Inversion formulas	205
References	209
Subject Index	215
Notation Index	219
