Contents

Preface vii

Tomás Recio & Carlos Andradas
D. W. Dubois and the Pioneer Days of Real Algebraic Geometry 1

Papers on Real Algebraic Geometry

S. Akbulut
On Algebraic Structures of Manifolds 11

Carlos Andradas and Jesús M. Ruiz
On Local Uniformization of Orderings 19

Ralph Berr
Real Algebraic Geometry Over p-Real Closed Fields 47

Ludwig Bröcker
On the Reduction of Semialgebraic Sets by Real Valuations 75

Thomas C. Craven
Orderings for Noncommutative Rings 97

Charles N. Delzell
Nonexistence of Analytically Varying Solutions to Hilbert's 17th Problem 107

M. A. Dickmann
A Combinatorial Geometric Structure on the Space of Orders of a Field II 119

M. J. González-Lopez and T. Recio
Formal Determination of Polynomial Consequences of Real Orthogonal Matrices 141

Roland Huber and Manfred Knebusch
On Valuation Spectra 167

M. Marshall
Minimal Generation of Basic Sets in the Real Spectrum of a Commutative Ring 207

Albrecht Pfister
A New Proof of the Homogeneous Nullstellensatz for p-Fields, and Applications to Topology **221**

M. J. de la Puente
The Compatible Valuation Rings of the Coordinate Ring of the Real Plane **231**

Gilbert Stengle
Estimates for Parametric Nonuniformity in Representations of a Definite Polynomial as a Sum of Fourth Powers **243**

Papers on Quadratic Forms

Jón Kr. Arason, Richard Elman,and Bill Jacob
On Generators for the Witt Ring **247**

Eberhard Becker and Thorsten Wöermann
On the Trace Formula for Quadratic Forms **271**

W. Bichsel and M.-A. Knus
Quadratic Forms with Values in Line Bundles **293**

Martin Krüskemper
On Annhilators in Graded Witt Rings and in Milnor's K–Theory **307**

Ka Hin Leung
An Application of the Theory of Order Completions **321**

David B. Leep and A. S. Merkurjev
Growth of the u-Invariant Under Algebraic Extensions **327**

Ján Mináč
Remarks on Merkurjev's Investigations of the u-Invariant **333**

R. Parimala and W. Scharlau
On the Canonical Class of a Curve and the Extension Property for Quadratic Forms **339**

R. Parimala and R. Sridharan
Reduced Norms and Pfaffians Via Brauer-Severi Schemes **351**

R. Perlis, K. Szymiczek, P. E. Conner, and R. Litherland
Matching Witts With Global Fields **365**

Jonathan Shick
On Witt-Kernels of Function Fields of Curves **389**

V. Suresh
On the Canonical Class of Hyperelliptic Curves **399**

Epilogue **405**
