Wavelet Methods for Pointwise Regularity and Local Oscillations of Functions

Stéphane Jaffard
Yves Meyer

September 1996 • Volume 123 • Number 587 (second of 4 numbers) • ISSN 0065-9266

American Mathematical Society
Providence, Rhode Island

Table of contents

Introduction p. 1

I. Modulus of continuity and two-microlocalization p. 8
I.1 Modulus of continuity p. 8
I.2 Pointwise smoothness and two-microlocalization p. 14
I.3 Pseudodifferential operators and two-microlocalization p. 22
1.4 Characterizations of two-microlocal spaces p. 25

II Singularities of functions in Sobolev spaces p. 30
II.1 Hausdorff dimension of the singularities of functions in $L^{p,s}$ p. 32
II.2 Packing dimension of strong α-singularities p. 37
II.3 Singularities of BV functions p. 41
II.4 Sobolev regularity of trace functions p. 44

III Wavelets and lacunary trigonometric series p. 48
III.1 Pointwise regularity of Hardy functions p. 48
III.2 Convergence and derivability of wavelet series p. 52

IV Properties of chirp expansions p. 56
IV.1 Indefinitely oscillating functions and chirps p. 56
IV.2 Characterization of chirps: statement of results p. 60
IV.3 Proof of Theorem 5.2: $(I) \Rightarrow (II)$ p. 65
IV.4 Proof of Theorem 5.2: $(II) \Rightarrow (I)$ p. 66
IV.5 Proof of Theorem 5.2: $(I) \Leftrightarrow (III)$ p. 70

V Trigonometric chirps p. 72
V.1 Definition and statement of the main theorem p. 72
V.2 Some asymptotic expansions p. 75
V.3 Proof of Theorem 5.1 p. 81

VI Logarithmic chirps p. 89

VII The Riemann series p. 96
VII.1 Trigonometric chirps at rationals p. 96
VII.2 Logarithmic chirps at quadratic irrationals p. 102

References p. 106

Index p. 109

Notations p. 110
