Preface	vii
---------------	-----

Chapter 1

Riemann domains	1
1.1 Riemann domains over \mathbb{C}^n	3
1.2 Holomorphic functions	18
1.3 Examples of Riemann regions	21
1.4 Holomorphic extension of Riemann domains	25
1.5 The boundary of a Riemann domain	29
1.6 Union, intersection, and direct limit of Riemann domains	39
1.7 Domains of existence	50
1.8 Maximal holomorphic extensions	54
1.9 Liftings of holomorphic mappings I	62
1.10 Holomorphic convexity	75
1.11 Riemann surfaces	86

Chapter 2

Pseudoconvexity	96
2.1 Plurisubharmonic functions	96
2.2 Pseudoconvexity	129
2.3 The Kiselman minimum principle	153
2.4 $\bar{\partial}$ -operator	159
2.5 Solution of the Levi Problem	177
2.6 Regular solutions	184
2.7 Approximation	190
2.8 The Remmert embedding theorem	195
2.9 The Docquier–Grauert criteria	201
2.10 The division theorem	208
2.11 Spectrum	219
2.12 Liftings of holomorphic mappings II	224

Chapter 3

Envelopes of holomorphy for special domains	235
3.1 Univalent envelopes of holomorphy	235
3.2 k -tubular domains	258

3.3	Matrix Reinhardt domains	284
3.4	The envelope of holomorphy of $X \setminus M$	302
3.5	Separately holomorphic functions	324
3.6	Extension of meromorphic functions	334
 <i>Chapter 4</i>		
Existence domains of special families of holomorphic functions		341
4.1	Special domains	341
4.2	The Ohsawa–Takegoshi extension theorem	388
4.3	The Skoda division theorem	410
4.4	The Catlin–Hakim–Sibony theorem	422
4.5	Structure of envelopes of holomorphy	441
List of symbols		461
Bibliography		469
Index		483
