Contents

Preface xi

List of participants xiii

Norm attaining operators into $L_1(\mu)$
MARÍA D. ACOSTA 1

The Weyl-Browder spectrum of a multiplier
PIETRO AIENA 13

On polynomial approximation in the mean
JOHN AKEROYD AND ELIAS G. SALEEBY 23

A uniqueness theorem for normal functions of several complex variables
JOHN T. ANDERSON AND JOSEPH A. CIMA 27

Separating maps on spaces of continuous functions
JESÚS ARAUJO AND KRZYSZTOF JAROSZ 33

Hypercyclic differentiation operators
RICHARD ARON AND JUAN BÈS 39

On norms of composition operators on Hardy spaces
P. AVRAMIDOU AND F. JAFARI 47

Stable ranks, K-groups and Witt groups of some Banach and C^*-algebras
C. BADEA 55

Locally constant almost everywhere Fourier transform
ALAIN BERNARD AND GILBERT MURAZ 65

The quaternionic Riemann problem
SWANHILD BERNSTEIN 69

Convolution by means of bilinear maps
OSCAR BLASCO 85

On prime real JB^*-triples
C.-H. CHU, A. M. GALINDO, AND A. RODRÍGUEZ PALACIOS 105

Compact-type operators defined on H^∞
MANUEL D. CONTRERAS AND SANTIAGO DÍAZ-MADRIGAL 111

On the extensibility of certain homeomorphisms and linear isometries
S. J. DILWORTH 119

The fixed point property for subsets of $L_1[0,1]$
PATRICK N. DOWLING 131

Strong regularity for uniform algebras
J. F. FEINSTEIN AND D. W. B. SOMERSET 139

High order smoothness in sequence spaces and spreading models
RAQUEL GONZALO AND JESÚS ANGEL JARAMILLO 151

A survey of closed ideals in familiar function algebras
PAMELA GORKIN AND RAYMOND MORTINI 161

Subalgebras of commutative Banach algebras and Fourier multipliers with natural spectra
OSAMU HATORI 171

Bergman kernels and Hankel forms on generalized Fock spaces
FINBARR HOLLAND AND RICHARD ROCHBERG 189

When is a linear functional multiplicative?
KRZYSZTOF JAROSZ 201

A remark on Banach spaces isomorphic to their squares
N. J. KALTON 211

Sobolev spaces and projections of holomorphic functions and mappings
STEVEN G. KRANTZ AND MARCO M. PELOSO 219

Universal functions on the unit ball and the polydisk
FERNANDO LEÓN-SAAVEDRA 233

On commutative C^*-algebras in which every element is almost the square of another
TAKESHI MIURA 239

Some special bounded homomorphisms of a uniform algebra
TAKAHIKO NAKAZI 243

Analytic functional models for operators on Banach spaces
MICHAEL M. NEUMANN 253

Injective isometries in Orlicz spaces
BEATA RANDRIANANTOANINA 269

Continuity of homomorphisms and derivations on Banach algebras with an involution
ANGEL RODRÍGUEZ-PALACIOS AND M. VICTORIA VELASCO 289

A Volterra type operator on spaces of analytic functions
ARISTOMENIS G. SISKAKIS AND RUHAN ZHAO 299

Algebraic properties of Toeplitz operators on the Hardy space via the Berezin transform
KAREL STROETHOFF 313

Multiplication and composition operators between two L^p-spaces
HIROYUKI TAKAGI AND KATSUHIKO YOKOUCHI 321

Bourgain algebras and inductive limit algebras
T. TONEV 339

A note on averaging operators
ABDELMAJID TRIKI 345

Problems on isometries of non-commutative L^p-spaces
KEIICHI WATANABE 349

Multiplicative polynomial operators on topological algebras
ANDRIY ZAGORODNYUK 357
