

TABLE OF CONTENTS

PART 1

Author index	xi
Preface	
RICHARD V. KADISON	xvii
Operator algebras—the first forty years	1
RICHARD V. KADISON	
On the structure theory of C^* -algebras: some old and new problems	19
EDWARD G. EFFROS	
Homological invariants of extensions of C^* -algebras	35
JONATHAN ROSENBERG	
Geometric resolutions and the Künneth formula for C^* -algebras	77
CLAUDE SCHOCHET	
The K -groups for free products of C^* -algebras	81
JOACHIM CUNTZ	
The internal structure of simple C^* -algebras	85
JOACHIM CUNTZ	
K homology and index theory	117
PAUL BAUM AND RONALD G. DOUGLAS	
Extensions of AF algebras: the projection lifting problem	175
LAWRENCE G. BROWN	
On the K -theory of the C^* -algebra generated by a projective representation of \mathbb{Z}^n	177
GEORGE A. ELLIOTT	
Extensions of Cuntz-Krieger algebras	181
MASATOSHI FUJII	
EXT-groups as K -groups	185
WILLIAM L. PASCHKE	
On a conjecture of Effros-Shen	187
NORBERT RIEDEL	
Positive matrices and dimension groups affiliated to topological Markov chains	191
DAVID HANDELMAN	
A graph theory for C^* -algebras	195
YASUO WATATANI	
The harmonic analysis of automorphism groups	199
WILLIAM ARVESON	

Dynamical systems and crossed products GERT K. PEDERSEN	271
Morita equivalence for operator algebras MARC A. RIEFFEL	285
Applications of strong Morita equivalence to transformation group C^* -algebras MARC A. RIEFFEL	299
On certain properties of crossed products ELLIOT C. GOOTMAN	311
Minimal abelian group actions on type I C^* -algebras ELLIOT C. GOOTMAN AND DORTE OLESEN	323
Twisted crossed products, the “Mackey Machine,” and the Effros-Hahn conjecture PHILIP GREEN	327
Equivariant K -theory and crossed product C^* -algebras PHILIP GREEN	337
C^* -algebras of groupoids and foliations JEAN N. RENAULT	339
Period two automorphisms RICHARD H. HERMAN	351
Fixedpoint algebras versus crossed products OLA BRATTELI	357
The dual topology of a crossed product and applications to group representations JONATHAN ROSENBERG	361
Ideals of C^* -crossed products by locally compact abelian groups A. KISHIMOTO	365
Duality for C^* -crossed products and its applications HIROSHI TAKAI	369
A correspondence between subgroups and subalgebras in a C^* -crossed product HISASHI CHODA	375
Tensor products and nuclear C^* -algebras E. CHRISTOPHER LANCE	379
Stone-Weierstrass theorems for separable C^* -algebras JOHN W. BUNCE	401
On maximal abelian subalgebras of C^* -algebras R. J. ARCHBOLD	409
Pure states as a dual object for C^* -algebras FREDERIC W. SHULTZ	413
L^2 -index theory on homogeneous spaces and discrete series representations ALAIN CONNES AND HENRI MOSCOVICI	419
Unitary representation of Lie groups and generalized symplectic geometry L. PUKANSZKY	435

Characters and semicharacters on connected Lie groups NIELS VIGAND PEDERSEN	467
Classical groups and classical Lie algebras of operators PIERRE DE LA HARPE	477
Some representations of $U(\infty)$ ȘERBAN STRĂTILĂ	515
A survey of foliations and operator algebras ALAIN CONNES	521
Some properties of the C^* -algebra associated with a foliation THIERRY FACK AND GEORGES SKANDALIS	629
