PREFACE xi

1

BASIC SET THEORY 1

- 1.1 Inclusion* 1
- 1.2 Operations on Sets* 4
- 1.3 Partially Ordered Sets and Lattices* 9
- 1.4 Functions* 14
- 1.5 Relations; Cartesian Products* 19

2

CARDINAL NUMBERS 21

- 2.1 *Countable Sets* 21
- 2.2 *Cardinal Numbers* 27
- 2.3 *Comparison of Cardinal Numbers; Zorn's Lemma* 31
- 2.4 *Cardinal Addition* 40
- 2.5 *Cardinal Multiplication* 41
- 2.6 *Cardinal Exponentiation* 44

3

WELL-ORDERING; THE AXIOM OF CHOICE 49

- 3.1 *Well-ordered Sets* 49
- 3.2 *Ordinal Numbers* 55
- 3.3 *The Axiom of Choice* 58
- 3.4 *The Continuum Problem* 64

4

BASIC PROPERTIES OF METRIC SPACES 67

- 4.1 *Definitions and Examples* 67
- 4.2 *Open Sets* 71
- 4.3 *Convergence; Closed Sets* 75
- 4.4 *Continuity* 80

5

COMPLETENESS, SEPARABILITY, AND COMPACTNESS 84

5.1 *Completeness* 84

5.2 *Separability* 94

5.3 *Compactness* 98

6

ADDITIONAL TOPICS 106

6.1 *Product Spaces* 106

6.2 *A Fixed-point Theorem* 108

6.3 *Category* 111

APPENDIXES 115

1. *Examples of Metric Spaces* 117

2. *Set Theory and Algebra* 122

3. *The Transition to Topological Spaces* 127

SELECTED BIBLIOGRAPHY 133

INDEX 137
