PREFACE

The core of this book is the author's thesis, Algebraic Spaces, written under Michael Artin at the Massachusetts Institute of Technology. The object there as here was to work out the foundations à la EGA for the theory of algebraic spaces, and hence give the necessary background for Artin's fundamental papers Algebraization of Formal Moduli I, II.

While working on this book, I was supported by M.I.T., Boston College, Columbia University, and the Advanced Science Summer Seminar at Bowdoin College, sponsored by the National Science Foundation. To all these institutions, I extend my gratitude. My special thanks goes to Professor Michael Artin both for many helpful discussions and for his initial suggestion that I undertake this project.

Donald Knutson

CONTENTS

Introduction	1
<u>Chapter One: The Etale Topology of Schemes</u>	29
1. Grothendieck Topologies and Descent Theory	29
2. The Zariski Topology of Schemes	38
3. The Flat Topology of Schemes	52
4. The Etale Topology of Schemes	59
5. Etale Equivalence Relations	72
<u>Chapter Two: Algebraic Spaces</u>	91
1. The Category of Algebraic Spaces	91
2. The Etale Topology of Algebraic Spaces	101
3. Descent Theory for Algebraic Spaces	106
4. Quasicoherent Sheaves and Cohomology	113
5. Local Constructions	120
6. Points and the Zariski Topology	129
7. Proper and Projective Morphisms	139
8. Integral Algebraic Spaces	144
<u>Chapter Three: Quasicoherent Sheaves on Noetherian Locally Separated Algebraic Spaces</u>	153
1. The Completeness / Extension Lemma	153
2. The Serre Criterion	159
3. Schemehood and Nilpotents	165
4. Chevalley's Theorem	169
5. Devissage	173
<u>Chapter Four: The Finiteness Theorem</u>	176
1. Actions of a Finite Group	177
2. Symmetric powers of Projective Spaces	185
3. Chow's Lemma	192
4. The Finiteness Theorem	202

VI

<u>Chapter Five: Formal Algebraic Spaces</u>	204
1. Affine Formal Schemes	204
2. Formal Algebraic Spaces	215
3. The Theorem of Holomorphic Functions	224
4. Applications to Proper Morphisms	233
5. Completions of Modules of Homomorphisms	241
6. The Grothendieck Existence Theorem	245
 Index	 252
 Bibliography	 257
