

V. V. Kozlov

# Dynamical Systems X

General Theory of Vortices

Springer

Title of the Russian edition:  
Obshchaya Teoriya Vikhrej

Izdatel'skij Dom, Udmurtskij Universitet, 1998

Mathematics Subject Classification (2000):

34-02, 37-02, 70-02, 76-02, 37Jxx, 70Exx, 70Gxx, 70Hxx, 76Mxx

ISSN 0938-0396

ISBN 978-3-642-07584-1 ISBN 978-3-662-06800-7 (eBook)  
DOI 10.1007/978-3-662-06800-7

# Contents

Introduction . . . . .	1
Descartes, Leibnitz, and Newton . . . . .	1
Newton and Bernoulli . . . . .	4
Voltaire, Maupertuis, and Clairaut . . . . .	5
Helmholtz and Thomson . . . . .	6
About the Book . . . . .	8
Chapter 1. Hydrodynamics, Geometric Optics, and Classical Mechanics . . . . .	9
§1. Vortex Motions of a Continuous Medium . . . . .	9
§2. Point Vortices on the Plane . . . . .	16
§3. Systems of Rays, Laws of Reflection and Refraction, and the Malus Theorem . . . . .	23
§4. Fermat Principle, Canonical Hamilton Equations, and the Optical–Mechanical Analogy . . . . .	29
§5. Hamiltonian Form of the Equations of Motion . . . . .	37
§6. Action in the Phase Space and the Poincaré–Cartan Invariant . . . . .	46
§7. Hamilton–Jacobi Method and Huygens Principle . . . . .	52
§8. Hydrodynamics of Hamiltonian Systems . . . . .	61
§9. Lamb Equations and the Stability Problem . . . . .	70
Chapter 2. General Vortex Theory . . . . .	76
§1. Lamb Equations and Hamilton Equations . . . . .	76
§2. Reduction to the Autonomous Case . . . . .	80
§3. Invariant Volume Forms . . . . .	87
§4. Vortex Manifolds . . . . .	90
§5. Euler Equation . . . . .	97
§6. Vortices in Dissipative Systems . . . . .	101
Chapter 3. Geodesics on Lie Groups with a Left-Invariant Metric . . . . .	108
§1. Euler–Poincaré Equations . . . . .	108
§2. Vortex Theory of the Top . . . . .	114
§3. Haar Measure . . . . .	120
§4. Poisson Brackets . . . . .	125
§5. Casimir Functions and Vortex Manifolds . . . . .	129
Chapter 4. Vortex Method for Integrating Hamilton Equations . . . . .	135
§1. Hamilton–Jacobi Method and the Liouville Theorem on Complete Integrability . . . . .	135
§2. Noncommutative Integration of the Hamilton Equations . . . . .	139

§3. Vortex Integration Method . . . . .	143
§4. Complete Integrability of the Quotient System . . . . .	152
§5. Systems with Three Degrees of Freedom . . . . .	157
Supplement 1: Vorticity Invariants and Secondary Hydrodynamics . . . .	160
Supplement 2: Quantum Mechanics and Hydrodynamics . . . . .	165
Supplement 3: Vortex Theory of Adiabatic Equilibrium Processes . . . . .	169
References . . . . .	177
Index . . . . .	181
