Preface ix

Notation xiii

I Introduction 1

CHAPTER 1. Mathematical Foundations of Integration 3
1.1 Riemann Integrals 3
1.2 Improper Integrals 10
1.3 Cauchy Principal Value Integrals 14
1.4 Hadamard Finite Part Integrals 17
1.5 Curve and Surface Integrals 24

CHAPTER 2. Computational Integration in Practice 29
2.1 Computational Statistics 30
2.2 Integral Transforms 33
2.3 Finite Element Methods 37
2.4 Boundary Integral Methods 44

CHAPTER 3. Fundamentals of Computational Integration 49
3.1 Integration Problems 49
3.2 Problem Settings 52
3.3 Integration Methods 56
3.4 The Conditioning of Integration Problems 62
3.5 Software for Computational Integration 66
3.6 The Preprocessing of Integrals 75
3.7 The Postprocessing of Integrals 79

II Symbolic Integration 89

CHAPTER 4. Symbolic Integration 91
4.1 Representations and Operations in Algebraic Computation . . 92
4.2 The Problem of Symbolic Integration 99
4.3 Integration of Rational Functions 101
4.4 Integration of Elementary Functions 103
4.5 Integration of Nonelementary Functions 107
4.6 Definite Integration 108
4.7 Symbolic Methods for Preprocessing Integration Problems . . . 110

III Numerical Integration 111

CHAPTER 5. Univariate Integration Formulas 113
5.1 Construction of Quadrature Formulas 114
5.2 Simple Interpolatory Quadrature Formulas 125
5.3 Compound Quadrature Formulas 144

CHAPTER 6. Multivariate Integration Formulas 155
6.1 Construction of Cubature Formulas 155
6.2 Polynomial Formulas 165
6.3 Number-Theoretic Formulas 185
6.4 Pseudorandom Formulas 202
6.5 Lattice Rules 213
6.6 Miscellaneous Formulas 232

CHAPTER 7. Methods for Special Integration Problems 235
7.1 Oscillatory Integrals on Bounded Regions 235
7.2 Integrals on Unbounded Regions 244
7.3 Weakly Singular Integrals 265
7.4 Cauchy Singular Integrals 276
7.5 Finite Part Integrals 290

CHAPTER 8. Integration Algorithms 297
8.1 Error Estimation 298
8.2 Discretization Refinement 318
8.3 Special Features of Integration Algorithms 330

CHAPTER 9. Parallel Numerical Integration 349
9.1 Parallelism in Integration Algorithms 349
9.2 Parallelization Schemes for Integration Algorithms 358
9.3 Practical Parallelization of Integration Algorithms 371

CHAPTER 10. Assessment of Numerical Integration Software 387
10.1 Assessment Criteria 387
10.2 Assessment Techniques 392
