Graph Colorings

Marek Kubale
Editor

American Mathematical Society
Providence, Rhode Island

Contents

Preface	ix
Graph coloring	ix
History of graph coloring	x
Models of graph coloring	xi
Preface to the English Edition	xii
Chapter 1. Classical Coloring of Graphs	
ADRIAN KOSOWSKI, KRZYSZTOF MANUSZEWSKI	1
1.1. Basic terms and definitions	1
1.2. Classical vertex-coloring	6
1.3. Classical edge-coloring	16
Chapter 2. On-line Coloring of Graphs	
PIOTR BOROWIECKI	21
2.1. On-line and off-line coloring	21
2.2. On-line coloring algorithms	23
2.3. Worst case effectiveness of on-line coloring	24
2.4. Expected effectiveness of on-line coloring	27
2.5. Susceptibility of graphs	28
2.6. Coloring of intersection graphs	29
2.7. Applications to resource management	31
Chapter 3. Equitable Coloring of Graphs	
HANNA FURMAŃCZYK	35
3.1. Equitable vertex-coloring	35
3.2. Equitable total coloring	50
Chapter 4. Sum Coloring of Graphs	
MICHAŁ MAŁAFIEJSKI	55
4.1. Definition and simple properties	55
4.2. The complexity of the sum coloring problem	58
4.3. Generalizations of the sum coloring problem	63
4.4. Some applications of the sum coloring problem	64
Chapter 5. T -Coloring of Graphs	
ROBERT JANCZEWSKI	67
5.1. The spans	67
5.2. Sets of forbidden distances	69
5.3. T -colorings of graphs	70
5.4. T -spans and T -chromatic numbers	71
5.5. Homomorphisms and T -graphs	73

5.6. Estimates and exact values	74
5.7. The computational complexity	75
5.8. Approximation algorithms	76
5.9. Applications	77
Chapter 6. Rank Coloring of Graphs	
DARIUSZ DERENIOWSKI	79
6.1. Vertex ranking	79
6.2. Edge ranking	87
Chapter 7. Harmonious Coloring of Graphs	
MAREK KUBALE	95
7.1. Introduction	95
7.2. Graphs with known harmonious number	97
7.3. Bounds for the harmonious chromatic number of general graphs	99
7.4. Algorithm Depressive	101
7.5. Applications	102
Chapter 8. Interval Edge-Coloring of Graphs	
KRZYSZTOF GIARO	105
8.1. Basic properties of the model	105
8.2. Consecutively colorable bipartite graphs	109
8.3. The span of interval coloring	113
8.4. Deficiency of graphs	115
Chapter 9. Circular Coloring of Graphs	
ADAM NADOLSKI	123
9.1. Circular coloring of the vertices of a graph	123
9.2. Circular coloring of the edges of a graph	130
Chapter 10. Path Coloring and Routing in Graphs	
JAKUB BIAŁOGRODZKI	139
10.1. Basic definitions	139
10.2. Known results	143
10.3. Applications	151
Chapter 11. List Colorings of Graphs	
KONRAD PIWAKOWSKI	153
11.1. Notation and definitions	153
11.2. Bipartite and 2-choosable graphs	154
11.3. The Hajós Construction	156
11.4. D-choosability and Brooks theorem	157
11.5. Planar graphs	158
11.6. Graphs for which $\chi = \chi_L$	159
11.7. (k, r) -choosability	160
11.8. Edge-list coloring	161
Chapter 12. Ramsey Colorings of Complete Graphs	
TOMASZ DZIDO	163
12.1. Notation and basic definitions	163
12.2. Ramsey numbers	164

12.3. Values and properties of classical Ramsey numbers	166
12.4. Nonclassical Ramsey numbers	170
12.5. Applications of Ramsey numbers	173
Chapter 13. Placing Guards in Art Galleries by Graph Coloring PAWEŁ ŻYLIŃSKI	177
13.1. Introduction	177
13.2. Fisk's proof	180
13.3. The orthogonal art gallery theorem	182
13.4. Orthogonal polygons with holes	183
13.5. Final remarks	188
Bibliography	189
Index	203
Authors' addresses	207
