Contents

Preface	xi
Conventions and Notation	xv
Introduction	1
Chapter 1 Hardy's Inequality and Related Topics	11
1.1 Weighted Lebesgue Spaces and the Hardy Operator	11
1.2 Hardy's Inequality With Derivatives	22
1.3 Some Notation and Modifications	25
1.4 Hardy's Inequality for Some Special Classes of Functions	27
1.5 The Role of the Interval	31
1.6 Compactness of the Hardy Operator	35
1.7 Some Limiting Inequalities – Preliminary Results	42
1.8 Limiting Inequalities – General Results	45
1.9 Miscellanea	51
1.10 Comments and Remarks	59

Chapter 2	Some Weighted Norm Inequalities	65
2.1	Preliminaries	65
2.2	A Special Operator	67
2.3	General Hardy-type Operators. The Fundamental Lemma	77
2.4	General Hardy-type Operators. The Case $p \leq q$	89
2.5	General Hardy-type Operators. The Case $p > q$	99
2.6	Some Modifications and Extensions	114
2.7	Comments and Remarks	116
Chapter 3	The Hardy-Steklov Operator	119
3.1	Introduction	119
3.2	Some Auxiliary Results	127
3.3	The Case $p \leq q$	129
3.4	The Case $p > q$	136
3.5	Some Applications	147
3.6	Some Generalizations and Extensions	155
3.7	Comments and Remarks	162
Chapter 4	Higher Order Hardy Inequalities	165
4.1	Preliminaries	165
4.2	Some Special Cases I	167
4.3	The General Case	174
4.4	Some Special Cases II	191
4.5	Reducing the Conditions	196
4.6	Overdetermined Classes ($k = 1$)	199
4.7	Overdetermined Classes ($k > 1$)	207
4.8	Overdetermined Classes (Another Approach)	221
4.9	Again the Interval $(0, \infty)$	237
4.10	Comments and Remarks	242
Chapter 5	Fractional Order Hardy Inequalities	245
5.1	Introduction	245

5.2	An Elementary Approach. The Unweighted Case	248
5.3	The General Weighted Case	254
5.4	Hardy-type Inequalities and Interpolation Theory	275
5.5	Further Results	284
5.6	Comments and Remarks	295
Chapter 6 Integral Operators on the Cone of Monotone Functions		301
6.1	Introduction	301
6.2	The Duality Principle of Sawyer	303
6.3	Applications of the Duality Principle	313
6.4	More General Integral Operators	322
6.5	Comments and Remarks	331
References		335
Index		355
