TABLE OF CONTENTS

	Page
Preface .....	v
Prefactory note to the Translation .....	ix
<b>Chapter I. Introductory material .....</b>	<b>1</b>
§1. Basic notation and terminology .....	2
§2. Classical statements of the problems. The maximum principle .....	11
§3. On admissible extensions of the concept of a solution .....	25
§4. Basic results and their possible development .....	42
<b>Chapter II. Auxiliary propositions .....</b>	<b>57</b>
§1. Some elementary inequalities .....	58
§2. The spaces $W_q^l(\Omega)$ and $H^l(\bar{\Omega})$ . Embedding theorems .....	60
§3. Different function spaces depending on $\alpha$ and $t$ . Embedding theorems .....	74
§4. On averagings and cuts of elements of $L_q(\Omega)$ , $L_{q,r}(Q_T)$ and $V_2^{1,0}(Q_T)$ .....	82
§5. Some other auxiliary propositions .....	99
§6. On estimates of $\max  u $ . The class $\mathfrak{U}(Q_T, \gamma, r, \hat{k}, \kappa)$ .....	102
§7. The class $\mathfrak{B}_2(Q_T, M, \gamma, r, \delta, \kappa)$ .....	110
§8. The function classes $\mathfrak{B}_2(Q_T \cup \Gamma', \dots)$ and $\hat{\mathfrak{B}}_2(Q_T \cup \Gamma', \dots)$ .....	122
§9. The function classes $\mathfrak{B}_2^{N^l}$ .....	128
<b>Chapter III. Linear equations with discontinuous coefficients .....</b>	<b>133</b>
§1. Statement of the problem. Generalized solutions .....	134
§2. The energy inequality .....	139
§3. Uniqueness theorems .....	145
§4. Solvability and stability of the first boundary value problem in the classes $V_2^{1,1/2}(Q_T)$ and $W_2^{1,1/2}(Q_T)$ .....	153
§5. On the solvability of other boundary value problems. The Cauchy problem .....	167
§6. On estimates in the space $W_2^{2,1}(Q_T)$ and their consequences .....	172
§7. An estimate of $\max_{Q_T}  u $ . The maximum principle .....	181
§8. Local estimates of $\max  u $ .....	191
§9. Estimates of some norms of Orlicz for generalized solutions .....	194
