

Table of Contents

Introduction	1
List of General Mathematical Notations	8
Part I. KAM Theory	
Chapter I. Symplectic Dynamical Systems	15
§1. Symplectic Vector Spaces	15
§2. Symplectic Manifolds	33
§3. Symplectic Dynamical Systems	57
§4. Symplectic Gluing	65
§5. Cross-sections	75
§6. Generalized Geodesic Flows	83
§7. Completely Integrable Hamiltonian Systems	91
§8. Systems in an Annulus	111
Notes to Chapter I	119
Chapter II. KAM Theorems	121
§9. The KAM Torus	121
§10. KAM Set	129
§11. The KAM Theorem in an Annulus	131
§12. Near a Torus	133
§13. Near a Periodic Motion	135
§14. Near the Boundary of Planar Convex Billiards	142
§15. The Robustness of a KAM Set	150
Notes to Chapter II	159
Chapter III. Beyond the Tori	160
§16. General Picture of Stochasticity Near KAM Tori. The Case of More than Two Degrees of Freedom	160
§17. Picture of Stochasticity Near KAM Tori in the Case of Two Degrees of Freedom	169
Notes to Chapter III	186

Chapter IV. Proof of the Main Theorem	188
§18. Two Reductions	188
§19. Machinery	191
§20. Description of the Iterative Process	198
§21. Reproduction of (20.1i) and (20.2i). Convergence of F^i	200
§22. Estimates of Ψ_{i+1}	202
§23. Reproduction of (20.3i)	204
§24. Reproduction of (20.4i)	205
§25. Convergence of the Process and the Estimate of $\ \Phi - id\ $	206
§26. Derivatives of G at points of $\mathbb{R}^n \times \mathcal{E}$	208
§27. The End of the Proof of Theorem 18.10	209
§28. Deduction of the Theorem for Discrete Time from That of Continuous Time	210
Notes to Chapter IV	221
Part II. Eigenfunctions Asymptotics	
Chapter V. Laplace–Beltrami–Schrödinger Operator and Quasimodes	225
§29. Basic Facts about Self-Adjoint Operators and Spectra	225
§30. Laplace–Beltrami–Schrödinger Operator	226
§31. Particular Cases	232
§32. Quasimodes	235
§33. Degenerated Quasimodes	236
Notes to Chapter V	240
Chapter VI. Maslov’s Canonical Operator	242
§34. Assumptions	242
§35. The Local Canonical Operator	243
§36. The Commutation Rule	256
§37. Theory of Maslov’s Indices	267
§38. A Global Formula for Maslov’s Operator	284
Notes to Chapter VI	293
Chapter VII. Quasimodes Attached to a KAM Set	294
§39. The Canonical Maslov’s Operator Associated with a KAM Set	294
§40. Quantum Conditions and the Set Λ	299
§41. Construction of Quasimodes	301
§42. Orthogonality	305
Notes to Chapter VII	311

Addendum (by A.I. Shnirelman). On the Asymptotic Properties of Eigenfunctions in the Regions of Chaotic Motion	313
Appendix I. Manifolds	338
Appendix II. Derivatives of Superposition	358
Appendix III. The Stationary Phase Method	366
References	375
Subject Index	381
